

VOTERS APPROVE ADDITIONAL FUND FOR OUR SCHOOLS

The special school tax election held last Saturday resulted in the taxpayers of the Jefferson School District voting in favor of a tax to raise funds to build a two room addition to General Pershing school, and for additional school purposes. The sum to be realized from this tax will be \$17,000.

A very light vote was cast, many evidently believing that all approved the taxing of the people of the district for the much needed improvements, and did not take the trouble to go to the polls and cast their ballot in favor of the proposition.

But ninety-three votes were cast at the three polling places, of which fifteen were against the tax. The result was as follows:

	Yes	No
Jefferson	10	7
Vista Grande	37	7
Crocker	31	1

The result of this election will mean a \$17,000 tax will be levied immediately. The money will be used to build two additional rooms on the General Pershing school. The money left after this improvement has been made will be used for renovating and cleaning the schools, and if possible, for a salary increase for the instructors.

Additional room at the schools is badly needed, as the rapid growth of this section has resulted in a crowded condition of the schools which can be remedied only by larger school rooms.

Those who took enough interest in the welfare of the school children of the Jefferson district to go to the polls are to be commended.

CHILDREN'S SERVICES AT GRACE CHURCH

A fine program is being prepared for the children's services next Sabbath evening at 8 o'clock at Grace Presbyterian church. The different classes, with their teachers, have been practicing, and a fine time is assured all those who come. Children, bring your parents. Parents, bring your children, and let us have a real evening, with songs and recitations.

Rev. Lester Thompson, of St. Joe, Missouri, gave an excellent sermon last Sunday evening, and despite the many going away on account of the holiday, the church was filled for the evening worship.

Ninety-four at the Bible school and twenty at the C. E. meeting, so we are much pleased with the attendance, and ask that you help to keep it up.

The Ladies Aid gave a most excellent luncheon on Wednesday of this week.

You will always find the church open for the welcome of all at each service.

The church is full of willing people; some are willing to work and the others are willing to let them.

Religion generally is driven on low.

C. H. G.

PLAYGROUND PLANS DISCUSSED BY BODIEN

At the luncheon meeting of the Lions Club, Tuesday noon, Arthur Bodien, city trustee, gave the club members an idea of the city trustee's views on the playground situation. Mr. Bodien, as chairman of the playground committee, is in a position to enlighten the local club on the status of various angles which have come up for discussion, and stated that his committee and the whole board would be pleased to co-operate in any way possible in promulgating plans, and give the benefit of experience as to existing conditions, etc.

Charles Gibbons was a visitor at the club luncheon and complimented the club on their activities, as did Mr. Martin of the Wellman Co., who gave an interesting talk on manufacturing and warehousing in the grocery business. Ernie Micco entertained for a few minutes on the capture and the preparation of tender portions of beef from the butcher's angle.

AGED WOMAN RUN DOWN BY AUTO

Mrs. Marguerite Murray, aged 50, of South San Francisco, mother of eight children, was almost instantly killed last Friday night when she was run down by an automobile driven by Eddie Hickey, a nephew of Supervisor Thomas L. Hickey, and a resident of South San Francisco. The injured woman died five minutes after the accident. Hickey was booked on a charge of manslaughter, but was later exonerated of all blame.

Mrs. Murray was returning to her home from the home of a neighbor on the other side of the street when the accident occurred.

TO HOLD NOVENA AT ST. MAXIMUS

Beginning next Friday night, June 10, and continuing until Sunday, June 19, a solemn novena in honor of Our Lady of Perpetual Help will be held in St. Maximus church, Wellington and Mission streets. Services to be conducted every evening at 8 o'clock will consist of reading of petitions, saying of the novena prayers, sermon, blessing of the sick, and Benediction of the Most Blessed Sacrament. Every morning holy mass will be offered at 6 o'clock and at 9 o'clock.

The novena will be conducted by the Reverend Henry D. Sutton of the Redemptionist Fathers. Before coming West, Father Sutton was director of the St. Louis branch of the Arch-confraternity of Our Lady of Perpetual Help. During his short term as director, two monster novenas in honor of Our Lady of Perpetual Help were held in the large and beautiful gothic church of the Redemptionist Fathers in St. Louis. During the second of these, novena services were held six times a day to accommodate the ever growing throngs of Our Lady's clients. An average daily attendance during the novena of 15,000 attested the popularity of the devotion. This popularity, according to Father Sutton, can be accounted for only by the very remarkable answers to prayer granted by Our Lady to the thousands who made the novenas in a spirit of truly remarkable piety and devotion.

The St. Louis experience is one that is being duplicated today in all the cities where the Redemptionist Fathers have erected shrines to Our Lady of Perpetual Help. The shrine at St. Maximus church has already become known to the many clients of Our Lady in and around San Francisco. With the beginning of regular monthly devotions in honor of Our Lady of Perpetual Help and the annual celebration of the solemn novena preparatory to her feast, the world-wide devotion will become as generally known here as it is in all other great Catholic centers.

CALIFORNIANS EAT TONS OF BUTTER

In addition to manufacturing 74,117,880 pounds of butter last year, California imported 28,924,657 pounds from adjoining states for the use of its populace, according to an analysis of the butter market made by Sam H. Greene, secretary-manager of California Dairy Council. The analysis is based on figures released by the United States Bureau of Agricultural Economics.

Receipts of butter at Los Angeles during 1926 reported by the bureau, totaled 44,032,721 pounds, of which 22,011,398 pounds originated in California. The San Francisco market received 27,604,168 pounds, of which 20,700,924 pounds were manufactured in California. Twenty-six per cent of the butter shipments to the San Francisco market were from outside California as compared with 51 per cent to Los Angeles.

WEDDING AND ANNIVERSARY CELEBRATED ON SAME DAY

Miss Margaret McDonald, of Daly City, and Mr. Philip Deller, Jr., of Colma were married last Friday afternoon, May 27. The bride's parents, Mr. and Mrs. George E. McDonald, of 44 San Pedro avenue, Daly City, were celebrating their twenty-seventh wedding anniversary on that day with a family dinner, as they were married in Marin county on May 27, 1900. The young couple hastened their plans and surprised their families and friends by being married on that date. Mr. and Mrs. Deller expect to reside in Daly City.

P. G. & E. TO SUPPLY POWER TO DIAMOND MATCH CO.

The Pacific Gas and Electric Company has applied to the Railroad Commission for authority to enter into a contract with Diamond Match Company for the supplying of electric power to that company at its plant at Powellton, Butte county, for a period of eight years. Applicant sets forth that it will be required to make expenditures of approximately \$37,754 in extending its electric facilities to the plant of the Diamond Match Company, which proposes to purchase 1,300 horsepower maximum load under 2,300 volts head, the consumption during the first five years being guaranteed to produce a gross revenue to the electric company of at least one-fifth each year of the total cost of extending service to its plant.

Camp Fire Girls Raise \$100

The circus bazaar given at Millbrae last Friday evening by the Missaki Camp Fire Girls netted \$100. More than 1,000 articles were donated for the bazaar by parents and friends of the girls.

BAY SHORE ROAD EXTENSION SOUTH IS NOW ASSURED

The efforts of the Peninsula boosters to have the Bay Shore highway immediately extended from its present terminus at Broadway, Burlingame, to Fifth avenue, San Mateo, have finally proved successful.

The State Highway Commission, at a public hearing held last Wednesday afternoon in San Francisco, assured the Peninsula delegations that the funds are now available for the extension, and that work will be begun immediately. Rights-of-way have been secured to Fifth avenue, with the exception of two stretches in Burlingame. One of these is through the Carolan property between California drive and the bay, and the other is at the foot of Burlingame avenue.

City Attorney J. E. McCurdy of San Mateo spoke on behalf of the Peninsula people and told the highway commissioners that extension of the highway is a vital necessity. He told of the present congestion on El Camino Real, and declared that the four underpasses in San Mateo will greatly decrease the danger to automobilists from trains. These underpasses are located at Poplar, Tilton, Monte Diablo and Santa Inez avenues.

Members of the highway commission declared that they had personally inspected the Bay Shore highway, and were thoroughly in sympathy with the movement for the extension of the road. They also definitely announced that the money is now available and that the improvement will be under way without delay.

The commission's meeting room was packed to capacity, and practically every municipality and civic body between San Jose and San Francisco was represented.

LOCAL COUPLE MARRIED IN ST. MAXIMUS CHURCH

St. Maximus church was the scene of a very pretty wedding on Sunday afternoon, May 29, when Father Donohoe united in marriage Miss Lillian Regan and Laurence J. Rusting. The bride was gown in soft white satin and lace with veil fastened with lilies of the valley. The maid of honor, Miss Kathleen Regan, wore yellow, and the bridesmaid, Miss Catherine Graviani, wore orchid. The best man was Al Rabb and the groomsmen were E. Mecco. After the ceremony the relatives and guests were entertained at a most sumptuous feast at the home of the bride's parents on Brunswick street. The decorations were pastel shades of ribbon and spring blossoms, with a huge wedding bell suspended from an arch of green vines of smilax. The popular young couple received many beautiful gifts. After their honeymoon they will reside in Daly City, in a cozy cottage which has been furnished with everything a bride could wish for.

The bride is a daughter of Mr. and Mrs. William Regan, pioneers of Daly City, and the groom is a well known young business man of Daly City.

REALTY MAN VICTIM OF MONOXIDE GAS

A coroner's jury at Redwood City has decided that accidental inhalation of monoxide gas from the exhaust of his automobile caused the death of Fred Siemann, aged 38, Redwood City realty man, whose body, clad only in pajamas, was found late Thursday evening of last week, doubled up in the front seat of the car which stood in a garage at the Siemann home. The verdict was in agreement with findings at the Stanford University laboratory, where blood samples were examined when it was found that the ignition key of the automobile was turned on and that the battery was exhausted. Traces of monoxide poisoning gas were found in the blood samples taken from the heart of the dead man, according to the report of Professor J. Murray Luck of Stanford, who made the analysis.

GOVERNOR SIGNS BILL FOR ROAD MEMORIAL

With two of the five counties in California already marked with Victory highway markers, the state will designate this transcontinental line with a state marker under a bill appropriating \$4,000, signed by Governor Young on May 30. This bill, which was introduced by Assemblywoman Woodbridge, calls for the placing of such a marker at the Nevada-California line in the Truckee canyon. A bronze tablet will be placed on the monument dedicated to those Californians who served their country during the World War and in memory of those who gave their last full measure of devotion.

PAROLE GRANTED DRIVER WHO RAN DOWN BOY SCOUT

Last Monday, Harry E. Court, one time fashionable and prosperous automobile dealer of Burlingame, walked from San Quentin prison, a free man. He had been paroled by the State Prison Board, which held that the ends of justice had been satisfied for the killing of Freddie Hokamp, 13-year-old Boy Scout, and son of Alexander Hokamp, of San Mateo.

Freddie Hokamp was run down and instantly killed on the night of January 19, 1926. A few days later Court was apprehended and made a complete confession, declaring that he was intoxicated at the time of the accident. He pleaded guilty to the charges of driving while intoxicated and failing to render aid after the accident. Superior Judge George H. Buck gave Court prison sentences aggregating fifteen years and ordered him to pay a fine of \$5,000.

Some time ago several of Court's friends sought clemency for the prisoner, but it was ruled by Attorney General U. S. Webb that he was not eligible for parole because Judge Buck, in passing sentence, had not specified that the sentences were to run concurrently. This meant that Court would have to serve one year on each sentence before being eligible for parole.

When the parole was announced, it was said that Judge Buck had rectified matters by sending a new commitment, which specified that the sentences were to run concurrently, without public announcement, the State Prison Board proceeded to parole Court.

Alexander Hokamp, father of the boy who met an untimely death, declared, when the announcement of the parole was made, that he could not believe that there was justice in the parole of Court.

F. O. E. INSTALLATION THURSDAY EVENING

Thursday evening the Fraternal Order of Eagles held their installation of officers, followed by a banquet.

A. Bodien, Past President of Colma-Vista Grande Aerie, was the installing officer, and the officers installed for the ensuing term were: Otto A. Schramm, Junior Past President; S. M. Pfeifer, Worthy President; Wm. Bolger, Vice-President; W. Peterson, Chaplain; Edward Heim, Conductor; A. Gillet, Inside Guard; Geo. Reardon, Outside Guard; A. Sturla, Secretary; P. G. Kunzie, Treasurer; Dr. Willis Cline, Aerie Doctor.

The officers for the past term were congratulated for their efficiency in the handling of the Aerie's affairs during their term of office and the good work accomplished, and the members are looking forward to a continuance of this good work during the present term.

The retiring officer, James Reardon, new Past President, was presented with a gift, an Eagle emblem, from the Aerie, in appreciation of the good work he has done in the past years. The California state convention of Eagles will be held in Placerville on June 13, 1927, and many Eagles from San Mateo county will attend. The delegates from our local Aerie are William Bolger, Edward Heim, E. Nessler, James Reardon and O. A. Schramm.

FATALLY INJURED IN HIGHWAY ACCIDENT

Martin J. Lyons, aged 43, of San Mateo, was fatally injured last Monday night when he was run down by an automobile driven by Herman Holser, of San Mateo, the accident occurring on the state highway near Beresford. Witnesses declared that Lyons, who was walking north along the edge of the highway, appeared to step directly in the path of the car, which was proceeding north. Mr. Holser took the injured man to Mills Memorial hospital, but he died before the hospital was reached. Lyons had resided in San Mateo for twenty years and is survived by his wife and three children.

Girl Injured in Auto Crash
Anita Cook, aged 7, was cut about the face Saturday afternoon when an automobile in which she was riding was wrecked at San Mateo. The injured girl lives in Half Moon Bay. Other occupants of the car were but slightly injured.

Burlingame School Band Takes Trip
The Burlingame high school band recently participated in the national band contest at Council Bluffs, Iowa. There were twenty-six bands entered from all sections of the United States, California being represented by Burlingame and Modesto.

LAWS TO PROTECT VETERANS' RIGHTS

In the presence of high officers of the American Legion and state officials, Governor Young marked the observance of Memorial Day by signing a group of bills intended to protect the rights of war veterans of California and to promote the prosperity of those in need of aid.

One of the most important acts approved will permit veterans to add \$2,500 of their own funds to the \$5,000 sum permitted them as a loan in the purchase of a home under the veterans' farm and home loan act. The act also greatly simplifies the procedure for appraisal of properties offered as security for such loans, and allows more latitude to the State Veterans' Welfare Board in its operations under the act.

A bill by Assemblyman Vernon Gant of Modesto, a veteran, raises the revolving fund for farm and home purchases from \$500,000 to \$750,000 to enable the board to act more rapidly on applications and also to take care of additional outlay authorized by the increase of the individual loans.

Under another act signed by Governor Young, the federal government may intervene for the protection of veterans receiving allotments in certain cases of guardianship and similar matters. Another act permits the public administrator to act as guardian for incompetent veterans. Other legislation deals with the extension of license privileges to veterans in certain cases.

Armistice Day is declared a school holiday for all public schools except the University of California, in another bill.

HONORED OFFICIAL LAID TO LAST REST

Officials of San Mateo county and many peninsula cities gathered last Saturday afternoon for the last rites in honor of Mayor Frederick A. Cunningham, South San Francisco, who was laid to rest at Mount Olivet cemetery, Lawndale. The services were held at the chapel of the cemetery at 2:45, after the casket had reposed in state at the Cunningham home in South San Francisco, since the death of the mayor the previous Thursday afternoon.

Mayor Cunningham's death followed an operation performed May 4 at the South San Francisco general hospital, where specialists were in constant attendance, due to the development of blood poisoning, said to have affected the patient's heart. Mayor Cunningham was for many years a leader at South San Francisco, where he was recently chosen to resume the office of mayor, to which he was first elected in 1912.

COMPLETE FIRST UNIT OF S. F. PREVENTORIUM

Representing an investment of \$335,000, the first unit of the San Francisco Tubercular Preventorium, near Pulgas tunnel, in San Mateo county, has been completed. The structure consists of a service building and two dormitories, with accommodations for fifty persons. It occupies a beautifully wooded section a few miles west of Redwood City. Work on the sanatorium was started three years ago. At that time the San Francisco board of supervisors voted for an appropriation of \$100,000 and agreed with the board of health to provide funds from time to time until the project was completed. It will take five years to complete the entire project, Dr. William Hassler estimates. Thirty more units, including an administration building, are yet to be built.

LEGIONNAIRES TO VISIT FRANCE IN SEPTEMBER

With the return from the east of U. S. Attorney George J. Hatfield, California representative of the France convention committee of the American Legion, announcement is made that final arrangements for the second A. E. F. invasion abroad have been completed.

"Success of the coming national convention of the American Legion in Paris during the month of September is assured," Hatfield declares. "We have made the final preparations for the visit of the American Legion delegates, and the principal problem before us at present is the question of how we will handle the great crowd of war veterans who have applied for reservations for the trip abroad."

"California will have a place in the front ranks of the invading army of Legionnaires, and arrangements were completed during my visit to the national headquarters of the Legion at Indianapolis for the handling of the delegation from this state both enroute and abroad," Hatfield announced.

INCREASE OF SPEED LIMIT ON HIGHWAY EFFECTIVE IN JULY

Increase of the speed limit on California highways to 40 miles an hour, other provisions to facilitate traffic, important new regulations to promote safety in motor vehicle operation, to protect ownership and transfer of cars, and to clarify existing laws, are contained in the Breed bill amending the California Vehicle Act, which becomes effective July 29.

When Governor Young approved this measure last week, he gave owners and operators of motor vehicles in California practically a revised form of the "bible" to which motoring and motor car ownership in this state is subject. The bill was introduced by Senator Arthur H. Breed. It was sponsored by the Motor Vehicle Conference, an organization representing the California State Automobile Association, the Automobile Club of Southern California, and various other groups interested in motor vehicle and traffic matters.

The increase of the speed limit from 35 to 40 miles per hour was written into the measure in the Assembly on recommendation of the State Division of Motor Vehicles.

Other major provisions written into the new law are summarized as follows:

Revocation of operators' licenses is made automatic on three convictions for reckless driving instead of for speeding.

Examination for new operators of motor vehicles, heretofore optional with the Division of Motor Vehicles, is made mandatory. This provision will prevent the granting of licenses to operate automobiles to persons physically or mentally unfit.

The division is granted authority at any time to cancel all operators' licenses that have been outstanding three years or more and to require renewal subject to examination, in its discretion. Under this provision, incompetent and habitual violators of the motor vehicle laws may be "weeded out" in the interest of public safety.

Provision is made for the compilation of a complete record of accidents, involving death or injury, their causes and locations. Under penalty of being guilty of a misdemeanor, operators of motor vehicles are required to report accidents of this character to the Division of Motor Vehicles or local police departments within twenty-four hours. Police departments are required, under this section, to forward reports or copies thereof to the division.

Juries are authorized to recommend punishment for driving while intoxicated. This amendment will result in many more convictions for this offense. Under the present law the court must send all convicted persons to the penitentiary. This has resulted in juries being reluctant to convict, the jurors having in mind the severity of the punishment.

Peace officers are required to report stolen cars to the Motor Vehicle Division after one week, and also the fact of recovery. The division is required to check stolen car records before registering or transferring registration of any motor vehicle. This amendment will afford a complete record of stolen cars in the Division of Motor Vehicles and facilitate recovery.

To facilitate the recovery of stolen cars, used-car dealers are required to give notice of sale to the division. Notice of new car sales only have been required heretofore.

Persons found injuring or tampering with motor vehicles may be taken into custody immediately upon discovery by police officers, instead of receiving a five days' notice to appear.

It is made a misdemeanor to withhold a certificate of ownership when the purchaser is legally entitled to same.

Vehicles exceeding eighty inches in width are required to show clearance lights at night.

Parking stations are required to keep a record of cars stored longer than twelve hours, and garages must notify police of cars stored more than thirty days when the owner's name and address is unknown.

The percentage of motor vehicle license fees allotted to the Division of Motor Vehicles is increased from 20 to 25 per cent. This latter provision is in the interest of more adequate law enforcement, and particularly to make possible more inspectors and equipment to check on truck weights and violations of the law governing overloading on the highway.

Should Observe "Stop" Signs
Local folks are becoming somewhat careless about the "Stop" signs on Mission street. Violation of this ordinance is subject to a stiff fine, and no favorites can be played in the business of law enforcement. You are also warned not to keep machines on the street all evening.

FIRE PREVENTION HANDBOOK FOR SCHOOL CHILDREN ISSUED

What fire does to the forests and brush fields of California and how it can be prevented and controlled is the subject of a new circular entitled "A Forest Fire Prevention Handbook for School Children," issued by the California district, United States Forest Service, in co-operation with the state forester and the state superintendent of public instruction.

This circular deals especially with forest conditions and forest fires in California. The directions it contains, though prepared for the use of school children, are such as may be applied by any public spirited citizen who goes into the woods and wishes to do his part in preserving the forests. If they were put into general practice,

they would help mightily to reduce the enormous losses from fires which, in California alone, in the past five years, have totaled 12,545 fires that burned over 3,910,000 acres of timber and brush land and caused an estimated damage of \$6,400,000.

Copies of this handbook, Miscellaneous Circular No. 79, may be obtained free of charge from the District Forester, U. S. Forest Service, Ferry Building, San Francisco, or from any forest supervisor of the eighteen national forests of the state.

Lady Astor says having a husband is a full time job. And how about being one?

People in all walks of life should also be able to jump quickly and far.

ABOUT WOMEN

Several airplane races open only to women pilots are being planned for London this summer.

Miss Natalie Giddings, of Chicago, was declared to have the perfect radio voice in a test of 112 female voices in that city.

Mrs. W. A. Moss, of Great Yarmouth, England, is the last woman survivor of the siege of Lucknow in 1857.

Miss Patricia Labelle, known throughout Canada as the "female Houdini," escapes from handcuffs and straight-jackets while suspended in mid-air, head downwards.

Sister Perpetue, spiritual adviser at a woman's prison in Paris, is the first nun to receive the Legion of Honor.

Mrs. James Putnam, of Exeter, England, has won a gold cup three years in succession with her fine dairy herd.

Mrs. Nancy Fluth, a niece of President Jefferson Davis of the Confederacy, is living in San Antonio, Texas, at the age of 100.

Of 1,513 young women students at the University of Kansas questioned regarding the careers to which they aspired, only seven expressed a desire to be housewives.

After seeing her first movie, Mrs. Mary Lloyd, aged 80, of Anniston, Alabama, said: "If I had a girl who went to picture shows I would turn her up and spank her."

Mrs. Mateel Howe Farnum, daughter of E. W. Howe, famous Kansas editor, has been awarded the first prize of \$10,000, offered by New York publishers, for her new novel, "Rebellion."

Mrs. E. M. H. McCauley, state director of public welfare in Pennsylvania, has a daughter, Ruth, who has been chosen queen of the Swathmore College campus carnival.

Miss Hope Henderson, of Morris-town, N. J., landed a 231 pound tarpon while fishing with two men companions off Knights Key, Florida.

Mrs. Mabel Hansen, of Evansville, Ill., runs two garages, one of 150 cars and the other of 115 cars capacity.

Mrs. Nina Duryea, of Stockbridge, Mass., has invented a new fabric of paper composition, said to be suitable for many garments.

Mrs. Caryll Hoffman, game warden at Sioux Falls, S. D., made ten arrests in a single day.

Miss Irene Coe, of Omaha, will quit society to manage the million dollar oyster business left by her father.

It costs \$8 to feed a python, but the meal lasts him a month.

BOYS AND GIRLS

Ronnie Matthews, 12-year-old blind boy, is one of the regular announcers at the powerful Vancouver radio station of the Canadian National Railways.

A recent survey showed that about 345,000 girls in the United States were married at the age of 15 or under.

Henry Morgan, aged 14, of Wadsworth, England, was whipped by his father last summer when he came home with wet clothes. Now it has been found that he saved a chum from drowning at the time, and he will receive a medal.

A baby only 14 days old recently traveled from London to Paris by airplane.

James Jeffries, Jr., of Lamar, Mo., aged, 11, preaches a sermon every Sunday.

Ritta Lannen, of New York, aged 9, crossed the Atlantic alone to visit an aunt in Ireland.

Caroline Grubbs, of Junction City, Ky., has attended school ten years and eight months without being tardy.

A 12-year-old page in the Tennessee senate recently took the floor and moved to adjourn to see Babe Ruth in an exhibition game. The motion carried and a few minutes later the house followed suit and the whole legislature attended the game.

"Big Boy," 3-year-old film star, whose real name is Malcolm Sabiston, is to be featured next year in juvenile comedies.

A statue of Mildred Marcia Pinkenfield, of Brooklyn, who was recently adjudged a perfect baby by fifteen doctors, is being modeled by Ernesto Peruggi, a prominent sculptor.

Rose McManus, aged 13, won both beauty and popularity contests at the Cairo, Ill., high school, where she is a freshman.

When Billy Joyce, aged 4, of Duns-more, Pa., was mired in mud some distance from his home, his two dogs stood by him barking for 15 minutes until he was rescued.

Four boys who were caught sending in false fire alarms at Mendota, Ill., must wash and polish the local fire truck each Saturday for four months.

Children from 8 to 10 years old have recently displayed pictures at a Paris art exhibition.

What would a little girl have to do nowadays in order to be classed as a tom-boy?

Aimee's bobbed hair might have gotten by easier if she had let the kidnapers snip it.

INTERESTING NOTES

Mexico will impose a 25 per cent tax on cigarettes.

Two archbishops and twenty-four bishops are members of the British House of Lords.

Canada's birth rate is greater than that of any other white nation, being about 23 per 1,000 population. That of the United States is about 22.

Seventy nations are represented at an international congress on agriculture which opened in Rome on May 26.

In Liberia, Africa, men must be negroes owning real estate in order to vote.

Japanese will use moving pictures for the teaching of etiquette.

Mont Blanc, between France and Italy, will be pierced by one of the world's longest railroad tunnels.

Arthur Hawes, of St. Paul, arrested for attempted suicide, said he took poison to frighten his wife.

Thomas Herbison, of Chicago, was convicted of stealing from his mother-in-law, after being caught in the act by his sister-in-law.

George Meacham, a barber of Canterbury, England, was jailed for thirty days for kissing a girl customer.

The wife of E. J. Saunders, of Preston, England, presented him with triplets on his birthday.

Seven sons of William Geldridge, of Swansea, Wales, are members of the police force.

A meteor which fell recently in Austria caused thousands of peasants to desert their homes in panic.

A bag containing \$5,000, dropped from a train by Mrs. A. H. Howells, was found near the track and returned to her at Vancouver, B. C.

As a penalty for dancing the Charleston, thirty girl students at Bromley, England, were denied their spring vacation.

TO GIVE AWAY FORTUNE

Another great captain of industry, who has amassed a large fortune during his sixty-eight years of active life, is planning to give it away for the benefit of humanity.

John Markel, one of America's leading coal operatives, will shortly retire from business life and devote his millions to educational and philanthropic purposes, through the medium of the John and Mary R. Markel Foundation, the principal objects of which are stated to be:

"To aid schools, colleges and libraries; to aid scientific and medical research; to establish industrial, recreational and welfare activities; to aid hospitals, and to provide necessities of life for the needy and worthy poor."

Mr. Markel's action is in line with that of an increasing number of American millionaires, who, after playing the game of business successfully for many years, take pleasure in giving back their winnings for the benefit of mankind.

Much of our educational and scientific advancement is due to the philanthropy of such men, many of whom

during their active careers were denounced as greedy "money-grubbers."

A Canadian trapper, known as "Old Benny," owes his life to his ability to use his head in an emergency. Taken suddenly ill 100 miles from the nearest settlement, he made his way to a nearby telegraph line in the woods and managed to cut the wire. He figured that "trouble shooters" would investigate the broken line and find him—and they did, just in time to save him from death.

"The Proof of the Pudding —is in the eating"

THE proof of a sales method is in the results obtained. The successful experience of a Pacific Coast manufacturer of fruitcakes, sold nation-wide, prompts this strong endorsement:

"Long Distance Telephone Service is the only method of transacting business speedily and efficiently."

Salesmen for this product are instructed and buyers encouraged to telephone their orders. Buying or selling, telephone service is the quick, reliable and economical method of reaching just the market or person desired.

Among the many new and practical uses of Long Distance you will find some applicable to your business. These will be cheerfully discussed with you upon request to the business office of the Telephone Company.

MISSIONARY TRAVELS IN AUTO-CHURCH

Father Riboud, a French Catholic missionary, believes in bringing the Gospel of God right to the door of the unbeliever instead of waiting for him to come and seek it. So he secured an automobile and equipped it with everything a chapel needs. Now he can minister to the soul-needs of the natives of the Dark Continent. The photograph shows the exterior of the auto-church, with Father Riboud holding an illustrated Bible lesson to the semi-naked Malaisian children at Bukit Martajam, province of Wellesley via Penang (Malaysia).

NEW SPARK PLUG IS MONEY SAVER

Small Investment at Proper Time Helps Make Larger Outlay Unnecessary.

Exhaustive tests by automotive engineers prove that motor car owners many times are compelled to spend considerable money to have their engines overhauled, and new parts put in, to overcome operating difficulties that could have been obviated had a new set of spark plugs been installed at the proper time.

More than 2,000 tests reveal that a complete new set of spark plugs at the end of each 10,000 miles of driving, or at least once a year, is actual dollars and cents economy. These tests have definitely shown that the saving in oil and gasoline alone, with new spark plugs, more than pays their cost within a few months, in addition to insuring greater general operating efficiency.

Change Plugs Regularly.

Motor car manufacturers, a few years ago, boasted of the long life of spark plugs. Today they are recommending in their instruction books that owners change their plugs regularly, even though spark plugs have been vastly improved in recent years.

It was formerly believed that a spark plug was giving efficient service so long as it continued to fire regularly. The engineering tests supplied overwhelming evidence that this was incorrect. The greater stress on spark plugs, caused by a combination of poorer gasoline and higher compression engines, saps their efficiency rapidly.

To secure full power from gasoline it is vital that the gas mixture in the cylinders be burned with tremendous rapidity. New spark plugs provide a sufficiently hot spark to accomplish this, despite the poorer quality of present-day fuels.

Causes Leakage.

Under this tremendous stress the electrodes become pitted. Carbon is burned on to the insulator and the shell. This causes a leakage of part of the current supplied from the battery, reducing the spark's intensity. Full power is not extracted from the gas mixture. Much good gasoline is wasted by passing out the exhaust. The longer the old spark plugs are permitted to remain in the cylinders the more vicious becomes the circle of poorer combustion, crankcase dilution and pitting of pistons and cylinder walls.

That is why manufacturers recommend that car owners install new spark plugs at regular intervals. To do so restores power and speed. In less than a year's average running there is a distinct loss which impairs engine performance. Then the owner may be faced with a bill for considerable repair work which could probably have been obviated had he renewed his spark plugs at the proper time.

Proper Steering Often Eliminates Bad Skids

Just why it is that so many motorists think of their brakes alone in connection with skidding remains a problem. Experienced drivers have said time and time again that they can take a car with bad brakes and prevent it from skidding through sheer good steering. But the average driver still clings to the idea that the skid is all a matter of traction and braking. When the streets are slippery and in dangerous condition, careful consideration always should be given to steering, with avoidance of quick movements in steering as the outstanding point. Make changes in the car's direction as carefully as you would apply the brakes, and if the car starts to skid, always steer in the direction of the skid, meanwhile releasing the brakes.

CALIFORNIA NEWS BRIEFS

State Controller Ray L. Riley has made public his annual report on the financial transactions of municipalities, counties and the state which shows that these political subdivisions increased their bonded indebtedness \$62,616,972.60 during the fiscal year 1926. "Extensive municipal enterprises," declared Riley, commenting on the bonds voted, "confronting several of the larger cities of the state in developing water supplies and possible extension of municipal enterprises would seem to require a conservation of bond capacity. There is no evidence of retrenchment and on the contrary every political subdivision of the state is continually increasing its bonded indebtedness out of line with increased property values."

Full blame for the crash which sent the Golden Gate ferry Golden City to the bottom of San Francisco bay on the night of April 24 was placed on the shoulders of Captain Aamen Johnson, master of the ferry, in a verdict announced by Captain Frank Turner and Captain Joseph Dolan. United States steamship inspectors. Suspension of his license for six months, was the penalty imposed on Johnson. He was convicted of negligent inattention to duty in driving his craft full speed ahead through a dense fog. The master of the McCormick steamship Newport, with which the Golden City collided, was exonerated of all blame in the inspectors' report of their investigation.

Fifty-one days of horror and intense suffering in the desert, during which he kept alive by eating reptiles and drinking poisonous water, ended for J. W. Saferight, 59, an oil prospector from Los Angeles, when he was found last week by two cowboys and brought to Santa Barbara. Saferight was looking for some oil shale deposits when he drank from a spring near Los Olivos, 50 miles from Santa Barbara, which is reputed to be poisonous. Within a few minutes the prospector became so ill he swooned. When he recovered consciousness he was too ill and weak to move more than a few feet from the spring and his camping equipment.

One of the famous song successes of modern times, "Lay My Head Beneath A Rose," was written thirty-seven years ago by Grant Falkenstein, veteran musician of Fresno, as part of the score of an amateur minstrel show given in Ventura, Calif. Falkenstein is now the trainer and director of the state champion Scouts' Band of Fresno. Dimly he remembers that he wrote it in a hurry to fill the needs of an amateur bass singer and that the theme was suggested by the dying wish of a young California landscape gardener who in his dying hour asked his friends to "Lay my head beneath a rose." The song has recently been popularized by radio broadcasting.

Returning to the methods of the padres and Indians of early day California, Mr. and Mrs. P. T. Smith of Marysville will construct their country home in Sutter county of heavy rammed earthen walls and partitions. Figuring that such a building is adapted especially to the California climate, the Smiths will have walls 12 to 18 inches thick. The earth, of a proper consistency of clay and sand, while slightly damp is placed in forms, a few inches at a time and tamped hard, additional layers being put on until the required height is reached. Tiling will be used on the roof, which will be of mission style.

Jesse James himself—not a motion picture—has been admitted to the California Bar. Jesse is the original Jesse James' son—the Jesse James whose two guns scared many a stage coach driver out of a year's growth, who robbed and shot, and was slain. The present-day Mr. James has put aside his father's two guns and uses in their stead equally effective, if not as deadly, law books for his persuaders. Attorney James was but 6 years old when a bullet stopped his father's career of banditry. He has practiced law for twenty-five years in the Middle West and is in Los Angeles for his health.

Despite the fact that she is nearing four score years, Mrs. Emma C. Mabie, pioneer Trinity county prospectress, has not given up hope that she will yet find the pot of gold in the mine of which she has long dreamed. But her hopes in connection with the Brown Bear claim, near Deadwood, she admits, have been disappointed. So loading up her pick and shovels on her faithful burro she has departed elsewhere. Mrs. Mabie learned her first lessons in mining at the age of seven from her father back in the fifties.

Hotel construction will boost the Bakersfield building program for May about \$65,000. The Bakersfield Community Hotel Corporation has been granted a \$100,000 permit for construction of the new \$125,000 El Tejon Hotel annex, raising the total for the first three weeks of May to almost \$150,000.

Several thousand spectators made the pilgrimage up the sunny slopes of Mount Tamalpais, Marin County, May 22, to witness the performance of "The Gods of the Mountain" the fourteenth annual production of the Mountain Play Association.

Erection of a new, modern fifty-room hotel at an estimated cost of \$65,000 is proposed for Colusa, Colusa County.

Burlingame voters have passed bond issues totaling \$210,000 for the purpose of providing the city with adequate fire protection.

California Synod of the Presbyterian church completed its two-day meeting in Berkeley last week and chose Pasadena as the city for the meeting in 1928.

W. H. Sale, California's oldest county clerk, celebrated at Willows last week the completion of his thirty-sixth year in that office. Sale has been county clerk since the formation of Glenn county.

The San Jose Mercury Herald is to build a three-story structure on the site of the old quarters on West Santa Clara street to cost \$125,000. It will be steel frame and concrete, and fire and earthquake proof.

Fresno was selected as the 1928 convention city of the California Affiliated Exchange Clubs at the close of the 1927 convention in Sacramento last week. The convention was won when Pasadena withdrew after much discussion.

The Indian death rate in California is greater than the birth rate, according to reports to the State Board of Health for the last year. The records show 283 deaths among the redskins during the twelve months as compared with only 223 births.

Plans for a new home for the First National Bank of Antioch approached realization recently when the bank completed the purchase of a new building site at the corner of Third and G streets. The amount paid for the property was not announced.

Lieutenant Walter J. Ligon, 28, Officers' Reserve, and a student pilot, Ivan L. Hall, 30, were killed May 24, when their airplane crashed directly in front of the hangars at Clover Field, Santa Monica. Eye-witnesses said the wings of the plane collapsed when it was about 2000 feet up.

Bonds of \$1,216,376 were passed by the West Stanislaus Irrigation District, by a vote of 52 to 1. The district, which includes 21,000 acres, will spend the sum realized by the sale of the bonds on installation of pumps on the San Joaquin River, and building of a system of distributing canals.

Score another intercollegiate victory for the University of California—this time in the Adonis sweepstakes. Displaying he-man pulchritude, histrionic ability and a certain amount of "it," Richard Miles Glendenin, recent graduate of the State University, has screen-tested his way to a place in the movies.

Lucy Foster Sexton, one of the few remaining "Covered Wagon" babies of California, died in her home in Santa Barbara last week at the age of 74. She crossed the plains in 1854 with her parents when 1 year old. She was the donor of Foster Glen County Park, dedicated to the memory of her parents. She is survived by ten children.

R. B. Hale of San Francisco was re-elected president of the California Development Association of the annual meeting of the board of directors at the St. Francis Hotel in San Francisco last week. At the same time the organization mapped an intensive program of state-wide development of California's natural resources.

Bebe Daniels, well known movie star, has decided to venture into the investment business. Articles of incorporation of the Bebe Daniels Corporation of Los Angeles were filed last week with Secretary of State Frank C. Jordan. It has a capital stock of \$500,000 and the directors are the movie star, Phyllis Daniels, and E. E. Morris of Los Angeles.

Rebellious students of the Sacramento High School, who appeared before the City Board of Education last week to protest against the ousting of Principal John F. Dale, have lost their fight to secure Dale's reinstatement. The protest was lodged by leaders in a student strike, which resulted in more than 1,000 youngsters quitting their desks for a day, several weeks ago.

Governor C. C. Young and M. B. Harris, newly appointed highway commissioner, were the principal speakers at the annual tour of the Sanger Chamber of Commerce organization on Wednesday, June 1st. The newly reconstructed Happy Gap-Sequoia Lake road into General Grant National Park, secured by the efforts of the local chamber last year, were dedicated during the day.

Few bridges on the state highway system of California are capable of carrying the maximum load allowed by law with complete safety, according to a statement made by R. M. Morton, state highway engineer, upon commencing a state-wide survey of highway bridges. The results of the survey, together with probable recommendations, are to be submitted to the highway commission at a future meeting.

Governor C. C. Young prepared the way for placing the statues of two illustrious and representative Californians in the Statuary Hall in Washington, D. C., by signing the bill, providing for the appointment of a commission to arrange for placing the busts of Father Junipero Serra and Rev. Thomas Starr King in the hall. Father Serra was the Franciscan missionary who founded the missions in California, while Rev. King was a Unitarian minister who played a prominent part in saving this state to the Union during the Civil War.

May Throw a Homer Into Centerfield

One of the new twirlers with the Athletics is Charles William Willis, an elongated left-hander. He was sent to the box as a relief man in a game against the Yankees at New York. He has a very peculiar delivery. One writer described his motion thus: "The young man stood facing first base as he started to wind, but when he went into his convulsions he faced third and his throwing hand reached back to his hip pocket as he let go."

Joe O'Brien, former president of the American association, and attache of the New York Giants, was in the press box. O'Brien, an expert on pitching observed dryly:

"One of these days he will lose his bearings and throw a homer into center field."

USE OF RESIN WILL CONTINUE THIS YEAR

Has Had Slight Effect on Batting Averages.

The resin bag is to be used again this season, as it was last year in the National league. Why the powers that be plan to retain it is a mystery. Apparently it did not serve its announced purpose to any great extent.

It was introduced with the idea of cutting down the hitting—of giving the pitcher more of an advantage than he had had over the batter. However, a figure or two. In 1925 54 batters in the National league finished the season with averages above the .300 mark. In 1926 (with the resin bag in the pitchers' box) 51 batters turned in averages over .300.

True, the total number of bases collected by the batters of the league dropped from 17,747 to 16,198 and the number of home runs from 634 to 439, but this drop can be attributed to the change in the baseball and not to the use of resin.

Whether the moguls admit it or not, the opinion is too general to be in error that the ball used in 1926 lacked the "hop" those of 1925 had.

That the application of the foreign substance increased the effectiveness of the hurlers but little, if at all, is indicated by the fact that there was a drop of but a little over 100 bases on balls in the 1926 season. This difference in a matter of some 3,000 passes issued unintentionally or otherwise during the year is insignificant.

And what a fuss was stirred up by the introduction of the little white bag. It was going to bring a baseball war and everything else of a dire nature.

Maybe it did, but we missed it.

Jack Quinn of Athletics Shames Young Twirlers

Young pitchers in the big leagues who offer the excuse that they are not "spring pitchers" when they turn in poor performances with a nearly solid month of training behind them were put to shame by the ancient Jack Quinn of the Athletics in St. Augustine recently.

Quinn, who is forty-two years old and a veteran of many hard campaigns, stepped off the full nine innings against the Giants, allowing only six hits and one run and was removed only to make room for a pinch hitter in the tenth inning.

The only Giant to drive in a run at Quinn's expense was Melvin Ott, who was born in 1909, the year Jack broke into the major leagues with the Yankees.

Good at Football

The Cleveland baseball writer who declared that Riggs Stephenson (shown in photograph) at one time a mighty football player at the University of Alabama, played some of his greatest football, referring to kicks and boots, while a member of the Cleveland infield, evidently was right, remarks John E. Wray in the St. Louis Post-Dispatch.

When the Chicago Cubs were here Joe McCarthy was using Stephenson at third base and hoped to keep him there throughout the season. Freigan, the third baseman of the team last year, wasn't hitting. But a few days of league play at third brought grief to the former Alabama gridiron star, and now he is back in the outfield where he belongs.

CHILDREN CRY FOR "CASTORIA"

Especially Prepared for Infants and Children of All Ages

Mother! Fletcher's Castoria has been in use for over 30 years to relieve babies and children of Constipation, Flatulency, Wind Colic and Diarrhea; allaying Feverishness arising therefrom, and, by regulating the Stomach and Bowels, aids the assimilation of Food; giving natural sleep without opiates.

The genuine bears signature of

Charles H. Fletcher

Extreme of Cold Not

Found at the Poles

The coldest spot in the world is not at the earth's poles. The lowest temperature experienced in the North by Amundsen was 51 degrees below zero Fahrenheit. In the Antarctic, the lowest temperatures have not been much in excess of this figure.

East of a line drawn from the mouth of the River Ob to Lake Balkal, the subsoil is always frozen even in the height of summer. In the northern part of this immense region is the town of Verkhoyansk, which is the world's coldest spot. In January the average temperature is minus 60 degrees Fahrenheit, or 92 degrees of frost. In July, however, the average temperature is quite warm, at nearly 60 degrees Fahrenheit, so that, between the two extremes, the mercury in the thermometer actually moves 120 degrees. Not only is Verkhoyansk the coldest spot on earth, but it also experiences the sharpest difference between the summer and winter temperature.

The occasional use of Roman Eye Balsam at night will prevent and relieve tired eyes and eye strain. 372 Pearl St., N. Y. Adv.

Electricity Found Aid to Duration of Life

Every child born today has the prospect of living five-sixteenths of a year longer than if born in 1911, according to figures recently compiled. Undoubtedly this remarkable result has been brought about by better living conditions, through modern science and education. Despite the intense speed of Twentieth century life, with its tension and dangers to the nervous system, life is easier than ever before in the history of the world, and the natural result is longer life.

That electricity has played an important part in bringing this about is unquestioned. It has made industrial working conditions immeasurably better by supplying good light, by making ventilation easier and more effective, by providing a simple form of power. It has revolutionized domestic labor, with its elimination of tedious, nerve-racking, back-breaking tasks through the medium of the modern electric appliance.

Airplane as Fire Fighter

In locating forest fires and directing attack, what better auxiliary could have been designed for the rangers' help than the swift and free-flying airplane?

When the judge is unlearned, it is the robe we bow to.

Takes Out all pain instantly

CORN'S

Dr. Scholl's Zino-pads stop all pain quicker than any other known method. Takes but a minute to quiet the worst corn. Healing starts at once. When the corn is gone it never comes back. If new shoes make the spot "touchy" again, a Zino-pad stops it instantly. That's because Zino-pads remove the cause—pressing and rubbing of shoes.

Dr. Scholl's Zino-pads are medicated, antiseptic, protective. At all druggists and shoe dealers—35c.

Dr. Scholl's Zino-pads

Put one on—the pain is gone!

THE BLUE AND THE GRAY

The beautiful and patriotic custom of decorating the graves of soldiers, which arose shortly after the Civil war, is now more widely observed, perhaps, than ever before.

National Decoration Day, or Memorial Day, which was celebrated last Monday, was first instituted by an order issued on May 5, 1868, by General John A. Logan, then commander-in-chief of the Grand Army of the Republic. Later it was made a legal holiday by practically all of the states of the Union.

Confederate Memorial day is April 26, but other dates are observed in a few Southern States. Before the World war, the national holiday on May 30 was little observed in the South, but through the influence of the American Legion and other patri-

otic organizations its celebration has become more general. In most of the Southern States both Confederate and national Memorial Days are observed.

In 1867 it came to the attention of F. M. Finch, a New York jurist and poet, that many women of the South had decorated impartially the graves of Confederates and Federal soldiers alike. This inspired his famous poem, "The Blue and the Gray," the last stanza of which follows:

No more shall the war cry sever,
Or the winding rivers be red;
They banish our anger forever,
When they laurel the graves of
our dead.
Under the sod and the dew,
Waiting the judgment day;
Love and tears for the Blue,
Tears and love for the Gray.

GETS MOST ALIENS

New York is listed as first of all and Texas second among the states as the future permanent residence of 246,322 immigrant aliens admitted into the United States from July 1, 1926, to March 31, 1927, the Department of Labor announces. Out of the grand total of aliens coming into the country during these three quarters of the present fiscal year, New York was the intended future permanent residence of 64,098, Texas of 28,808, and Michigan of 22,043. Massachusetts with its 19,839, almost tied with California as the prospective homes of 19,068, as did Illinois with 15,272 alien homeseekers, with Pennsylvania picked by 15,049 of the alien arrivals as their future residence.

WEEKLY NEWSPAPER INDORSED

Alfred P. Sloane Jr., president of the General Motors Corporation, recently gave a strong indorsement of the value of the weekly newspaper.

In discussing this year's advertising campaign for General Motors Corporation, Mr. Sloan, among other things, said:

"I believe in the country weekly newspaper. I believe that no printed matter in the United States is more thoroughly read, or has more influence than the pages of these home town newspapers."

THE LURE OF DANGER

Some men seem to be irresistibly attracted to enterprises fraught with danger. And when the spirit of high adventure gets into the blood, its craving is seldom satisfied.

This phenomena is well illustrated in the case of Charles Nungesser, the intrepid French aviator, who has doubtless perished in a reckless attempt to cross the Atlantic under conditions which invited disaster.

During the World war, Nungesser was credited with bringing to earth forty-five enemy planes. Even before that he had been the hero of many a daring exploit in South America and elsewhere. His utter contempt of death was shown over and over again. On each plane he flew he had painted a skull and cross-bones, a coffin and a candle, a device which was borne by the fated White Bird, the airplane which carried him and his companion, Coli, to death.

In his latest and last adventure, Nungesser discarded his wireless set, collapsible lifeboat, landing gear and other safety devices in order to reduce the weight of his craft, staking all on the slender chance of covering more than 3,000 miles in perfect flight. The odds were ten to one against him, and he was perfectly conscious of the fact.

But the lure of adventure gripped him. He went to his doom smiling and unafraid.

BETTER RELATIONSHIP

In a recent address, Haley Fiske, president of the Metropolitan Life Insurance Company, said he saw increasing signs of better understanding between employer and employee. There is much evidence that business men are regarding the human element in labor relationships, while on the other hand, trade unions are recognizing that peace and prosperity can be promoted by understanding, co-operation and recognition of common interest in industry.

"Anybody," he said, "who has watched the recent trend of pronouncements from labor organizations, must have recognized an entirely new attitude which labor is taking toward employers. There is every evidence that organized labor is recognizing the responsibilities of capital and the representatives of capital. As a matter of fact, the working people not only are becoming capitalists through savings, investments and life insurance, but they are forming corporations with large capital; they are organizing banks, trust companies, building associations, housing apartments, and, in New York, have formed a life insurance company which is going to do old line life insurance on scientific principles, with adequate reserves and ample capital. Business men should sympathize with this new attitude of labor, and lend a helping hand and seek co-operation.

"Is there not visible a new state of mind and a new vision which might perhaps be briefly expressed as co-operation rather than competition in the relationship between employer and employee?"

BORAH ON CHINESE PROBLEM

"A ban of outlawry on war" with China is urged by Senator William E. Borah. He proposed that America, Great Britain, France, Italy and Japan by formal agreement apply the principle "where outlawry is most needed."

He said: "The Chinese situation presents perhaps the most vital foreign problem since the war. There are more

than 400,000,000 people in China, while some 300,000,000 more sympathize thoroughly with their struggle for national independence. The entire Orient is saturated with the same feeling which actuates China. In dealing with China we are in some respects dealing with nearly one-half of the people of the globe. The conflict now raging in China may seem to us a great, aimless, hopeless sea of turmoil—nothing to engage our enthusiasm, nothing to command our admiration. But to millions of Chinamen it may not seem so. They may look upon it as a fight for independence, for nationhood, for national unity, for a place of equality with other powers."

FIRE DEMON ALWAYS READY

With uncanny punctuality, the Fire Demon recently arrived at several Eastern factories at the psychological moment when their defense against his machinations were inoperative. These defenses were automatic sprinkler systems, which, when properly installed and maintained, constitute highly efficacious safeguards against the sweep of the flames.

On each of the occasions mentioned "it just happened" that the sprinklers were temporarily in the non-working class because of shut-offs to prevent freezing, because repairs were being made, or for other reasons. In every case the result was property destruction running up into the hundreds of thousands of dollars, and the cessation of employment for hundreds of operatives.

These instances emphasize once again that the Fire Demon is always lurking in the shadows, waiting for a chance to demonstrate his powers. Eternal vigilance is the price of safety against fire.

NOTICE OF SALE OF REAL PROPERTY.

No. 3556.

In the Superior Court of the State of California, in and for the County of San Mateo.

In the Matter of the Estate of LOUIS LAGOMARSINO, Deceased.
Notice is hereby given that, in accordance with law, the undersigned executrix of the last will and testament of LOUIS LAGOMARSINO, deceased, will, on or after the 27th day of June, 1927, offer for sale and sell at private sale, as a whole or in subdivisions, as said executrix shall judge to be beneficial to the estate of said deceased, to the highest and best bidder or bidders for cash in lawful money of the United States, and subject to confirmation by said Superior Court, all of the right, title, interest and estate which said Louis Lagomarsino owned or had acquired during his life time, and after his death, to-wit: interest and estate that the estate of said deceased has by operation of law or otherwise acquired other than or in addition to that of said deceased at the time of his death, of, in and to all of the following described real property, to-wit:

PARCEL ONE.
An undivided one-half interest in and to all that real property situated in the County of San Mateo, State of California, described as follows:

A portion of Lots 5 and 7, Block 14, as delineated on that certain map entitled, "Map of the Lands of the School House Homestead Association," recorded in the office of the Recorder of San Mateo County, July 10, 1872, and filed in Book 1 of Maps, at Page 8, as follows:

Commencing at a point in the easterly line of Lot 6, distant thereon North 0 deg. 20 min. East, 130.11 feet from a stake marking the southeast corner thereof; thence curving to the right with a tangent bearing North 21 deg. 35 min. 34 seconds West along a line and westerly of 62.0 feet radially from the center line of the California Highway Commission Survey for the relocation of the State Highway known as Division IV, San Mateo County, Route 2, Section A, with a radius of 812 feet through an angle of 10 deg. 16 min. 48 seconds to a distance of 145.49 feet to a point in the northerly line of Lot 7; thence along said northerly line 22.44 feet to the northeast corner of said Lot 7 as surveyed by Geo. A. Kneese, County Surveyor of San Mateo County, in August, 1926; thence along the westerly line of the County Road South 37 deg. 54 min. 29 seconds East 31.42 feet, (shown on said recorded map as 34.0 feet); thence along the easterly line of said lots south 0 deg. 20 min. West 114.67 feet to the point of commencement.

PARCEL TWO.
An undivided one-half interest in and to all that real property situated in the County of San Mateo, State of California, described as follows:
A portion of Lots 87, 88, 89, and 90, Block 10, as delineated on that certain map entitled, "Property of the Garden Valley Land Association," recorded in the office of the Recorder of San Mateo County, January 22, 1872, and filed in Book 1 of Maps at Page 8, described as follows:

Commencing at the southeasterly corner of Lot 87; thence along the southerly line thereof South 89 deg. 46 min. West 32.89 feet to a point known as Station "A"; 92-13-30 P. O. T. of the California Highway Commission Survey for the relocation of the State Highway known as Division IV, San Mateo County, Route 2, Section A; thence continuing along said southerly line South 89 deg. 46 min. west a further distance of 67.45 feet; thence along a line parallel with and 62.0 feet westerly, measured at right angles, from the center line of said survey, North 23 deg. 25 min. West 230.22 feet; thence curving to the right with a radius of 812 feet through an angle of 1 deg. 49 min. 26 seconds for a distance of 26.85 feet to a point in the westerly line of Lot 89 and 90, being the easterly line of Lot 6, Block 14, of the School House Homestead, North 0 deg. 20 min. East 130.11 feet from a stake marking the southeast corner of said Lot 6; thence along the westerly line of lot 90, North 0 deg. 20 min. East 114.67 feet to the most northerly corner thereof, thence along the easterly line of said Lots 90, 89, 88 and 87, being the westerly line of the old County Road, to the point of commencement.

MANNER, TERMS AND CONDITIONS OF SALE.

Bids or offers will be received for said real property as a whole or for any subdivision or portion bid for; bids or offers may be made at any time after the first publication of this notice, and before the making of the sale; all bids and offers must be in writing, and may be delivered to the executrix, left for her at the law offices of J. E. McCurdy, Wisnom Building, San Mateo, California, or may be filed in the office of the Clerk of the Superior Court of the State of California, in and for the County of San Mateo, at Redwood City, California. The right is reserved to reject the whole or any part of any bid or to accept it as to any part or subdivision bid for. Sales will be made for cash in lawful money of the United States, ten per cent (10%) of the amount of any bid to be paid to the executrix on notice of acceptance of bid, and the balance of said sum to be paid to her upon the confirmation of sale by said Superior Court, and delivery or tender of deed; the instrument of purchase to be at the expense of the purchaser.

Dated: May 23, 1927.
ALICE LAGOMARSINO,
Executrix of the last will and testament of Louis Lagomarsino, Deceased.
J. E. McCurdy, Attorney for Executrix.

Colma News Notes

Isabel Silicani is rapidly improving after a recent illness.

The Girls' Club monthly supper will take place next week.

Elsie Wilkie has returned from an extended vacation in Yosemite valley.

The home of Mr. and Mrs. Ray Green has just emerged from a siege of interior decorating.

Mrs. A. Scramaglia is the proud mother of a seventh daughter, born Saturday morning at the Scramaglia home.

The Southern Pacific has finally completed the grading on Dunk street in front of its warehouse, to the great satisfaction of the nearby residents.

John Schenone left Sunday morning for a trip to Italy. After straightening up affairs there, he plans to return, bringing his wife and two boys. He will come back in September.

The county is filling in a bit of Dunk street, near Washington, which it owns. It is planned to erect a garage and warehouse for county trucks and machinery on the property.

The southbound Market Street No. 40 cars are now running on the new tracks, about 25 yards west of the old route. The northbound cars still run on the old track. The change has been made for only about the first 500 yards south of Colma.

Mr. Foppiano has left for Chicago with eight dogs for the races there.

The Standard Oil station at Mission and School street was repainted last week.

All the poles of the Market Street Railway on Mission street have been repainted.

Miss Rosa Bauer returned home Monday after an operation for a fractured hip and a spine correction.

Mr. J. Silicani left Sunday morning for a visit to Italy. He will be gone several months and plans to take a real vacation.

J. Millett's home has finally been moved back into location about 600 feet from its former site. The house will soon be lowered and anchored.

Marion Millett will go to Vallejo Saturday to run in the state 50-yard dash for girls. Miss Millett has made excellent time in practice and should easily be in the top flight.

An extension is being put on the front of the National Auto Garage, which will bring it out flush with the building line. A sales room and larger entrance will greatly improve this excellent garage.

A fire alarm was turned in Thursday at 5:30 p. m. The Colma department reached the scene of the fire nearly as soon as the siren had stopped. A small chimney fire at the home of Mr. Schenone of Cavora street was the cause of the alarm.

And then — let electricity do all the hard work

JUNE may remind you of the day of days. Or perhaps a day that is coming this month.

But no matter, if you would take care of the hand she gave to you, give her the labor-saving electrical appliances. They do all the hard house work. They wash the clothes and dishes, clean the house, cook automatically, and do innumerable little tedious things that wear a woman so. They preserve the bloom of youth. They give her free hours to spend with the children.

Buy her these electrical appliances for a wedding present or for the anniversary. She will reward your thoughtfulness by being the same youthful pal, always.

The regular monthly whist of the Colma Volunteer Fire Department will be held next Saturday, July 11, in Jefferson Hall.

The Sunday school of Holy Angels' church will hold a big picnic on Tuesday, June 14. According to present plans, they will spend the day at Angel Island. All parents and big brothers and sisters are invited to come along and make a gala day of the picnic.

Cards have been sent out announcing the engagement of Miss Estella M. Atkinson, of Colma, to Mr. James A. Packwood, of Burlingame. Miss Atkinson was born and raised in Colma. At present she is teaching at Crocker school. She is the very popular president of the Girls' Club of Colma.

Mr. George Hall, of San Mateo, conducted the final examinations at Jefferson grammar school Thursday. Fourteen graduates from Salada Beach, Rockaway Beach, Tobin and Visitation Valley took the examinations at the same time. This is a very large number of outsiders. The graduation exercises will be held on Thursday in the high school auditorium.

The Colma Community Center monthly social whist tomorrow evening will be bigger than usual, as it will be the last one before vacation. Matt Grady is in charge of the whist and Mrs. Volman will supervise the refreshments, where home-made cake will be dispensed. Come out and enjoy a good game tomorrow night in the Center hall.

In the All West-All East girls' basketball game Tuesday evening at Kezar stadium, the Easterners were victors by a score of 35 to 7. They received one of the hardest games of their tour, however. The Canadian national champions were defeated by a score of 70 to 0. The boys' game was new to the western girls, and they had practiced only two weeks. It is planned to keep the team together and try to beat the thus far undefeated Easterners. Miss Marion Millett played a stellar game, moving always with her unusual speed.

A double feature program has been scheduled for Monday and Tuesday, June 6 and 7, at the State Theatre, when "The Gorilla Hunt," amazing revelations of the African jungles, will be presented, also Evelyn Brent and Lawrence Gray in "Love 'em and Leave 'em."

"SHANGHAI GESTURE" AT CURRAN TO END JUNE 11

Al Jolson in "Big Boy" Next

The highly successful engagement of Florence Reed in "The Shanghai Gesture" at the Curran Theatre, San Francisco, will end on Saturday night, June 11.

"The Shanghai Gesture" is probably one of the most successful box office attractions on tour today. There is no question about it being the most popular dramatic offering, for it has broken records in the five cities in which it has played to date, New York, Chicago, Denver, Salt Lake City and San Francisco.

It is truly a brilliant, tumultuous, electrifyingly absorbing, colorful melodrama of the Orient. Its author, John Colton, the co-author of the unforgettable "Rain." A. H. Woods, the producer of this unusual play, has provided it with a distinguished cast and with a production as sumptuous as the Arabian Nights.

Another important theatrical event to open at the Curran Theatre on Monday night, June 13, is Al Jolson in his latest musical comedy success, "Big Boy."

DAVID BEATS GOLIATH

The following article, appearing in the May 12th issue of the Redwood City Tribune, will be of interest to the high school pupils of Daly City: "Our congratulations to Jefferson high school of Daly City!

"For the first time in memory, one of the smallest schools of the Peninsula Athletic League has put forth a team of sufficient strength to trounce the representatives of San Mateo high, Palo Alto and Sequoia. Such is the record of the Jefferson 130 baseball team!

"The northern school has 225 pupils, less than 100 of them are boys. And when one considers that, early in the season, their team was handicapped by the loss of two first-string players—one with a broken arm, the other through an attack of appendicitis—the achievement is all the greater.

"Not alone in the victory, but in the manner achieved, is credit due the Jefferson boys. They work together as a unit, they know how to bunt and when to use such offense, they field well and are in the game throughout. The student body is thoroughly behind its team.

"Coach Cooley, to whom Jefferson owes the success of its team, deserves the appreciation of his community, and has the congratulations of the league."

A New York messenger boy walking rapidly aroused suspicion and he was arrested for burglary.

As usual, platform makers will be chosen next year on account of their skill in dodging issues.

HIGH-LIGHTS OF NATIONAL P. T. A. CONVENTION

By Lillian G. Landini

Mrs. A. H. Reeve, national president, was presented with a gavel of California redwood from the Second district, Parent-Teachers' Association. Mrs. Walter H. Buling, president of the Illinois P. T. A. organization, was awarded a silver trophy for having obtained the largest number of Child Welfare Magazine subscriptions in the states.

Vermont was the only state that was not represented at the national convention.

California, unlike any other state, has been forced to subdivide its Parent-Teacher Councils into Federations, because of the large number of groups.

Pick a school superintendent that will work for the interests of the entire school, and not one group, but having once made the selection, stick by him. This was the gist of suggestions to convention delegates on the question of selecting superintendents. But under no condition sponsor a political candidate using the P. T. A. name as a whole.

Many of the national officers of the P. T. A. are now in Los Angeles at the state convention this week.

Rural and city women should get together for the best interest of the P. T. A. organizations.

A sturdy oak is the emblem of the P. T. A. The tree which is the original of the emblem was planted in Washington, D. C., by Mrs. Theodore Burnery and Mrs. Phoebe Hearst in 1897, the year the organization was founded.

PRESS DINNER OF THE P. T. A.

The press dinner of the P. T. A. in Oakland last week was more than interesting. The speaker's table was presided over by Mrs. Fletcher Scott, editor of the P. T. A. Magazine. The speakers were J. R. Knowland, who spoke on space given the P. T. A., and said that it was not to be expected that every little item about the P. T. A. could be spread out as some would have it, but that all items must be condensed, to be vital points of news, as newspaper space was very valuable. That all papers believed in giving out news of the great work being done by this national organization of the Parent-Teachers of America.

Vaughn McCaughey, of the Sierra Educational News, spoke on getting acquainted with our papers and magazines and folks who are trying to enlighten us in the best interests of state and national work regarding child welfare, and the best things to read. He said in part: "The white light can be used for work; but the subdued and warm, cheerful color is the spiritual side of soul appeal of the P. T. A. work. Man or woman can not live alone on continuous necessary work, but must have relaxation, with better, finer, harmonious things." That the spiritual side of any great work was very important, for the success of all folks and things. Dr. Louis M. Truman, of Stanford University, said: "Intellectual growth and genius can not be attributed to any one class of people. History has shown us that our greatest men and women have risen out of families having various standards of intellect. There are no set rules."

LILLIAN G. LANDINI.

OPENING SYMPHONY CONCERT ON SUNDAY

The opening symphony concert of the second summer series sponsored by the Philharmonic Society of San Mateo County will be given next Sunday afternoon at 3:15 o'clock in Hillsborough's new Woodland Theatre.

Nikolai Sokoloff, distinguished conductor of the Cleveland orchestra will direct the San Francisco Symphony orchestra, a noteworthy program having been prepared.

Mr. Sokoloff was guest conductor at several of the concerts last year and he won great success. On account of his popularity among the thousands of music patrons in the peninsula cities he has been engaged as the first conductor to direct a symphony concert in the new theatre.

The Woodland was officially dedicated last Sunday. Mr. Sokoloff was delighted with the acoustics and he gave high praise to the beautiful planning of the grounds, planning that has resulted in a perfect amphitheatre. Being relatively small, he said, this theatre makes possible a mutually gratifying intimacy of feeling between audience and performers. The very large open-air theatres lose much, scenically and acoustically.

TRANS-ATLANTIC TELEPHONE TALKING PERIOD EXTENDED

Effective Monday, May 23, the talking period available for trans-Atlantic telephone service, which had been six and one-half hours long, was further extended four hours.

The daily period for trans-Atlantic service which had been from 3:30 a. m. to 10 a. m., has been extended to include the period from 3:30 a. m. to 2 p. m., Pacific time.

Announcement of this change was received by the Pacific Telephone and Telegraph Company from the American Telephone and Telegraph Company.

The next Congress will consider flood control, but hardly succeed in controlling the flood of new laws.

PREPARE FOR TOURISTS COMING TO CALIFORNIA

Announcement that the last gap in the Victory highway will be filled on or before June 1 heralds one of the most important transportation developments in California since the first overland railroad was opened to traffic. It means the bringing of many thousands of Pacific-bound motor tourists to this section of the state who otherwise would be diverted either north or south from Utah.

They will be enabled to travel direct from Salt Lake City to the Golden Gate over a solid road touching a thriving town every few miles and offering scenic attractions possessed by no other route. Moreover, it will be the shortest way to reach the Yosemite, General Grant and Sequoia parks, Mount Lassen and Shasta, the Big Basin and other groups of giant trees, to say nothing of the San Francisco and Monterey peninsulas. The journey through the Truckee river canyon will alone reward every seeker of pleasing scenery who makes it.

What this influx will mean to business interests of this section may need no explanation further than to conservatively estimate that each visitor will represent a daily expenditure of \$10. According to that estimate every dollar contributed by San Francisco to build the Victory highway through Utah and Nevada will be returned manifold this year.

Californians, Inc., has arranged to have the supreme attractiveness of the new motor route advertised throughout the East by folders and newspapers that will reach at least

WHY ENDURE ACHES AND PAINS?

Ordinary drinking water will positively restore health if properly charged with RADIUM EMANATION (a gas produced by Radium ore.)

ten million readers. So it behooves the hotel keepers and merchants to prepare for a summer and fall trade of unprecedented magnitude.

CHAMPION JOB-HOLDER

People of North Hampton, N. H., believe that I. W. Marston of that town is the champion job-holder of the world, and their claim is not very likely to be disputed.

Among the offices held by Mr. Marston are those of chairman of the town board, chief of police, chief of the fire department, tax assessor, poor overseer, town moderator, member of the board of health and school board, fire warden under the state government, justice of the peace and notary public.

As North Hampton is a very small town, these jobs are mostly honorary, and Mr. Marston receives very little compensation for his varied activities in behalf of the public.

He makes a living by running a general store and lunch room.

Nearly all foreign governments have sent messages of sympathy for Mississippi flood sufferers and many offers of aid have been made.

We joked about Queen Marie, defied King George, and put the king of bootleggers in jail. That for your old royalty.

CHAPTER X—Continued

—15—

"How did he get off?" Bassett's voice was raised in his exasperation:

"Good Lord, Rawson, we weren't jailed here then. He could have had a boat hidden in one of the coves. This place wasn't escape-proof till you turned up. He could have rowed ashore and landed anywhere, and that's what he's done."

"Unless he's here."

"Here on the island?" Williams spoke with an air of patient reminder: "Ain't we gone over it with a fine-tooth comb?"

Rawson pointed to the ceiling: "How about that top story? A person—we won't say who—could have killed the woman, entered the house while the rest of you were on the beach, put back the pistol, and gone upstairs."

Williams made a motion to leave himself up from his chair. "Well, if that's how you feel about it let's go up and have a look for the person."

"We needn't do that just now. They're as safe as if they were behind bars. There's something I want to do down here first—have a talk with Miss Tracy. She may be able to give us a little light."

"She can't help you," said Bassett. "They weren't on confidential terms. She'd be the last person he'd tell anything to."

He believed what he said, but his heart sank. Anne to be dragged through another interrogation, an interrogation with a hideous suspicion behind it!

Rawson rose:

"Perhaps so, but it's worth trying. She may know more than you think; sisters sometimes do. And she certainly must have more knowledge of him than any of us. We'll soon see."

He moved toward the door.

"I'll go up and get her now."

CHAPTER XI

When Anne went up to her room she took a seat by the window where she could see the channel. It was an undecipherable blackness, its farther limit defined by the shore lights. But the night was very still, the sagging weight of cloud hung low, pressing down sounds.

She closed the door and decided now she might rest, not go to bed yet, but lie down and try to get back to courage and control. She took off her dress and put on her negligee, and with hands raised to loosen her hair heard a step on the stairs. It struck upon her ear, heavy and quick, a man's step, and she remained as she was, her arms lifted, her eyes staring into her reflected eyes in the mirror. She stood thus till it stopped at her door. When the knock came and Rawson's voice spoke her name, the hands dropped and she moved to the door.

"Can you come downstairs for a minute?" the voice said, low and guarded. "I'm sorry to ask you to get up."

She opened the door. "I hadn't gone to bed. Yes, of course I'll come. You wait to—"

"Just ask you a few more questions. I'm glad I didn't wake you."

She followed him along the passage and down the stairs. When she entered the library her glance fell on Bassett facing her across the room. His brows drawn low over the dark trouble of his eyes. His look told her of anxiety, apprehension and a passionate concern for her.

Williams indicated an armchair near the desk:

"Take a seat, Miss Tracy. Sorry we've had to call you down."

She fell into it and, as the men settled themselves in theirs, ran her tongue along her dry lips and took a deep breath of air into her lungs.

"We've been making some inquiries about your brother, Miss Tracy," Rawson began. "About his leaving here. You told us, as I remember, that you knew he went."

"Why, yes, he went."

"Did you see him go?"

"No—I didn't see the boat go, I was upstairs, but of course he went."

"We've found out that he didn't," said Rawson.

"Mr. Rawson's seen Gabriel." Bassett spoke very gently. "And he says he didn't take Joe over."

"But I don't understand. He was all ready. I said good-bye to him. It was his holiday, he'd been looking forward to it, he was crazy to go."

"And he told you he was going, wanted to go. Was he jolly and good-humored like a person starting on a holiday?"

"Yes—why shouldn't he be? It was what he'd been longing to do for years. After I left him I went to my room and dressed and when I went downstairs I saw that his bag and fishing rod, which he told me he'd left

thought of course he was. And he has, he's gone some other way."

"You're sure he's gone?" Rawson's emphasis on "you're" was heavy.

She looked at him with startled eyes:

"Yes, aren't you? Why, you don't think he's here?"

Rawson addressed Bassett:

"Didn't you tell me he was to stop tonight in Bangor and meet his friend?"

"Yes—they were to start out in the morning."

"Where were they staying?"

"Some hotel, I don't know the name. Do you remember it, Anne?"

She shook her head: "No. If he told me I've forgotten. I've no idea what it was."

"Hold on a minute," said Williams, stretching out his hand. "Shine spoke to me about that. He was asking

She Opened the Door.

about a hotel in Bangor young Tracy recommended—the Algonquin inn. That may be it."

Rawson swung the desk chair round and drew the telephone to him:

"We can find out in a minute."

They sat without moving while Rawson made the connection.

"Is there a Mr. Tracy there—Joe Tracy?" And then a period of listening, punctuated with grunts of assent from Rawson. Then, "Mr. Travers has gone—left on the six-fifteen this evening—I see." A silent stretch and a final "Thanks—that's all I wanted. Much obliged." The receiver clicked into its hook, and Rawson swung the chair toward them:

"Travers has been there waiting since last night. Tracy never showed up. Travers had no message from him and left this evening for Moosehead lake."

For a moment there was no comment. Anne raised her eyes, the sides of the room looked a long way off and the light seemed to have intensified to a violent glare as if she were sitting in the midst of a dazzling illumination.

"I don't know what to make of that," she said, the words dropping slowly with spaces between.

"Neither do we, Miss Tracy," said Rawson, and leaning back, his hands clasped over his stomach, he gazed intently at her through his horn-rimmed glasses.

"Yes, you do," she said and heard her voice hoarse and changed. "You've made something of it already. And what you've made is lies—wicked lies."

Then she had seen it. Bassett made a step forward, but she leaped to her feet, oblivious of him:

Notebooks in Pockets Have Banished String

The man who tied a string around a finger to remind him of errands to be done for his wife has forever departed. The string has been banished by the notebook so effectively that if ten men were challenged to account for their good memories nine would display notebooks and the tenth would confess that he made memoranda of his errands on the back of a letter.

Even the farmer no longer drives to town with his finger tied around with a string. He may not have the businesslike notebook, but somewhere in a pocket there is a letter he intends to answer some time, or a bill of sale, or a notice from the road overseer, and on the back of one of these he writes down the errands he is to do for his wife. There hasn't been a string fogger of memory in his generation.

"In the old days," explains an elder-

"You think he did it, just because you can't find him. That's all he's done, gone away. You must be crazy. What would he do it for? Don't you have to have a reason to commit murder?"

"They weren't good friends. I don't know why—I asked her, but she wouldn't tell me. And what was it—a quarrel, a grievance? But that wouldn't make him want to kill her!" "I've told them that, Anne," Bassett implored; "there's no use going over it."

Rawson leaned suddenly forward and caught her by the wrist:

"What did you see last night in the living room?"

If he had meant to surprise her he failed of his purpose. She hung back from his grip and said with defiant emphasis:

"I saw nothing!"

"Are you sure it was a book you came down for?"

"It was a book, as I told you."

"You could read a few hours after your friend was murdered?"

"I could try to read—it was better than thinking."

"You've got a pretty cool head, Miss Tracy," he added, and relinquished her hand. She fell back in her chair as if his hold upon her had been all that sustained her in an upright position.

He rose, looking down at her, curious and unsatisfied:

"I guess we'll call a halt for a while. We've other work to attend to. But wait here till we come back; we may have to do some more talking."

He turned to Williams and gave a jerk of his head toward the hall.

"Come on, we'll go up there now."

He walked to the door, Williams following him. As it shut after them Bassett went to her and bent over her chair.

She held him off with a hand on his breast and whispered:

"Where are they going?"

"Upstairs, to the top story."

She clutched the lapels of his coat:

"He's there, he's up there."

"He—who?"

"Joe!"

Bassett stared into her eyes. He thought her senses were giving way:

"Anne, darling, what's the matter? Joe's not here—you've just said so yourself."

"I said what wasn't true—he's there."

He caught her arms and drew her to her feet:

"What do you mean?"

"I know it, I've seen him."

"Seen Joe himself?"

"Last night when I came down for the book. He's hiding up there—I thought he was safe. And now they'll find him."

"I saw the launch go without him and I was going to speak to you, but Shine was there and I couldn't. Then she was killed and I didn't know what to think, where he'd gone, anything! But that night I heard them say there was a man on guard at the causeway, and I came down to tell him in case he was here and would try to get across. And then I saw him."

"Where?"

"In the living room. He came from the door into the kitchen wing and I whispered it."

"Did he say anything?"

"No—just ran the way he'd come in. And then I knew—" she stopped and closed her eyes. "Oh, I didn't know it but I thought it. Can it be true—could he have done it? One minute I'm sure and then I can't believe it; and I don't know, I don't know."

Drawing away from him she ran to the door, and opening it, stood listening. He followed her and with pauses for that tense listening, she told him of her visit to the top floor.

"Will you help me?" she whispered.

"Will you help me whatever happens?"

He nodded, there was no time now for words. He motioned her to sit down, and moved back from her, listening to steps which were crossing the living room, entering the hall.

Were they louder than they had been going up, were there three pair of feet where there had been two? They stopped at the door, it opened and Rawson and Williams entered.

Rawson spoke to Anne:

"You can go upstairs, Miss Tracy. We'll put off the rest of our talk till tomorrow. You better try to get some rest. And kindly remember to stay in your room. I don't want any mistakes made about that tonight."

She murmured words of compliance and rising with pale composure left the library.

When the door shut on her Bassett said: "You got nothing up there at all?"

(TO BE CONTINUED.)

Robe de Style Is Fashion Favorite

Period Frock Never Is Out of Picture; Popular at Palm Beach

Even in a season when tendency of the mode has been marked by a feminizing influence, preeminence of the period frock comes as something of a surprise climax. The surprise, observes a fashion writer in the Kansas City Star, registers with more force, too, in the midst of the devotion that is still extended to sophisticated types of the sleek and slinky variety, which base their identity upon the modern spirit of architectural lines, without encumbrance of any sort to disturb the contour, so frankly linked with the sports idea.

The period frock or robe de style has been on the horizon for two years. To speak more accurately, it never is out of the picture, but up to the last year it was associated with the choice of the individualist in style. Even now, when it has come out of this classification in a general way, there are many fashion authorities who contend that the skirt formed on bouffant lines departs from the current feeling in style.

It is interesting that these contentions are entirely in sympathy with the trend toward femininity in today's fashions, but support their convictions with frocks that express such items of elaboration in terms of what is graphically described by one stylist as the "stripped" silhouette.

Another type evolved this season, which bridges the distance between the distending lines of the pure period frock and slim silhouette, is based on a chiffon frock by Louise Boulanger, wherein all the characteristics of the period frock are retained—that is, the closely fitted bodice in contrast to the full skirt of ankle length, the important feature being the straight-hanging fullness of the skirt.

Referring again to the bouffant period frock's emergence from the individualist's choice exclusively, one recalls the repeated emphasis placed upon it in the reports from Palm Beach during the season just closed. Not one observer alone, but several, commented upon the increased numbers of those wearing them—not only the youthful type so generally associated with it, but women of the older set. One observer especially interested and surprised at this spectacle of sophistication in period frocks, sought to find the masculine reaction to this change, with the result that the majority of the men interviewed expressed complete satisfaction with the new picture—saying that they were tired of the slinky, unclothed appearance and were altogether pleased to contemplate the picturesque revival. Observations at supper clubs through the season in New York further have substantiated the note, which is not confined to the very youthful faction of the dancing assemblage.

Rose Colored Felt Is Chic for Spring Hats

This rose-colored felt hat with ribbon drawn through the crown, and the felt stitched in design, is in vogue for spring.

Plaid Is Important in Snappy Spring Styles

The importance of plaid in spring styles is still to be reckoned with. Not only taffetas for afternoon wear, but wools for travel, sport and morning use are shown in plaid design. Max, of Paris, who designs sports and travel clothes, as well as furs, shows a new spring three-piece suit of plaid with a simple hip-length cape. The color is light blue and navy. A jumper blouse, which looks like a vest when the cape is on, is made of light blue with an upstanding military collar.

Hats Too Small; Have to Construct Special Shapes

Formerly women used to wear shoes too small for them. Now they are prone to wear hats too small for them and to suffer agonies in consequence. Milliners seem constantly urging customers to choose the small hats which have to go on with a shoe horn. The unbobbed women in many cases have revolted and the milliners have had to construct special shapes and sizes for the long-haired heads.

Straight Lines Feature Billie Dove's Chic Coat

Billie Dove, the "movie" star, whose spring collection of coats is an alluring one, wears for daytime and sports a smart camel's hair coat of slender lines, becomingly collared and cuffed in tan calfskin. Pockets, too, are treated with this new fur trimming. Miss Dove appears in a scene from her film, "The Tender Hour," wearing this modern sports coat.

Styles of Elders Are Adapted for Children

The extent to which the styles in women's dress are copied in miniature for children is interesting and amusing. Belts are used in many of the new models, even on frocks for very little girls. In a daytime dress which is suitable for one of six, or one of the age of ten or more, English broadcloth in china blue is made with a round neck yoke of white muslin, to which the dress is attached in box plaits with fagoting in blue silk. A narrow string belt tied at one side lifts the frock into a slightly bloused effect, and a band of white is added with fagoting around the bottom. Another model is shown in which the material, peach-colored crepe de chine, is laid in small side plaits in front, with yoke and short sleeves of the crepe scalloped at the lower edge. The bottom of the frock is finished with a narrow band of blue crepe, and a string sash of the blue lifts the dress to blouse slightly about the hips.

Black and White Frock in Fashion Picture

In a season notable for its use of brilliant color in day clothes, a frock in black and white strikes an arresting note of contrast. It stands out and dominates the surrounding colors, insuring its wearer instant distinction.

For this reason a well-dressed woman invariably adds a number of models in this combination to her spring wardrobe, afternoon dresses chiefly, as black and white best lends itself to models of this decorative character.

If she is doubly wise, she also includes a black tulleur, as nothing is smarter than a trim, two-piece black suit worn with a white crepe Vionnet blouse and a small, black felt hat enlivened by a touch of white.

Dressmakers Seek New Ways of Using Fringe

New uses for the familiar fringe are eagerly sought in Paris by dressmakers who seemingly must have exhausted all possible arrangements of the popular trimming.

Any variation of the usual fringe effect takes a dress a long way toward success. When there is a new fringe and other pretty qualities as well, the model is sure to create interest at the fashion shows.

Worth shows a flowered chiffon dance dress with a splash of coral fringe under the right arm. There is an uneven hem and a trailing bow sash to give a unique grace to this frock.

Longer Coats Are Worn With New Paris Pajamas

Parisians now are trying on in the privacy of their boudoirs what they will brazenly parade this summer at the Lido. Pajamas show longer coats as a rule, and more latitude is allowed these costumes in the matter of printed silks. Flowers, usually formalized, are either huge or else very small.

Lelong offers a pajama suit with straight trousers fitted somewhat snugly at the hips. A fitted top pleat to the trousers is cut like a waistcoat.

Brocade Stocking Fad Introduced in Paris

Even Paris has been startled by a new style. Cafe crowds on the boulevards recently were aroused by the new brocade stockings in which many young women suddenly appeared. These stockings, the most sensational of the spring styles, when worn with very short skirts are most arresting. Heavy embroidery is combined with generous open work, and black is the favorite color.

MRS. BASSETT ALWAYS TIRED

Now in Good Health by Using Lydia E. Pinkham's Vegetable Compound

Lansing, Michigan.—"I have taken Lydia E. Pinkham's Vegetable Compound whenever I needed it. When I first used it I was so bad I could hardly walk across the room without crying. I was tired all the time. I think my trouble was coming on me for six months before I realized it. I read of your wonderful medicine in the paper, and . . . my husband bought me a bottle, and after the first few doses I felt better, so kept on taking it until I was well and strong. I take it at times when I feel tired and it helps me. I will always have a good word for your medicine and tell anyone what good it has done me. I recommended it to my neighbor for her girl, who is sixteen years old, and it was just what she needed. She is feeling fine now, and goes to school every day."—Mrs. E. F. Bassett, 216 South Hayford Avenue, Lansing, Michigan.

Do not continue to feel all run-down and half sick when Lydia E. Pinkham's Vegetable Compound is sold by druggists everywhere. It is a root and herb medicine and has been used by women for over fifty years.

"Cutting teeth is made easy" MRS. WINSLOW'S SYRUP

The Infants' and Children's Regulator At all druggists Non-Narcotic, Non-Alcoholic

Oakland, Nebr., Feb. 23, 1920

Anglo-American Drug Co., Gentlemen: I am more than glad to tell you of the experience and result obtained from your wonderful Baby Medicine. Our second baby is now seven months old and has never given us a moment's trouble. The first and only thing she has ever taken was Mrs. Winslow's Syrup. She has four teeth and is always smiling and playing. Cutting teeth is made easy by the use of Mrs. Winslow's Syrup. Most sincerely, (Name on request)

RADIO

"B" Eliminator Is Very Useful Part

Device Serves to Harness Usual Electric Lighting Current.

By CHARLES GOLEMPAUL

There is nothing really complicated about the usual "B" eliminator. It serves to harness the usual electric lighting current, obtained from the nearest socket or convenience outlet, to the radio receiver, in place of "B" batteries. Just how this is accomplished is worth knowing by those now enjoying a "B" eliminator, and by those contemplating the early purchase of such a device.

To begin with, the usual alternating current that comes from the socket or convenience outlet cannot be employed for radio purposes. It is current that flows first in one direction and then in the other, changing its direction of flow at the rate of many times per second. Such undecided current, if we may term it such, could not be introduced in a radio circuit without causing havoc. So it is obvious that the alternating current must be straightened out or made to flow in one direction only.

Through Transformer.

The first step is to pass the alternating current through a transformer which steps up the original voltage to twice or more its potential in order to operate the mechanism that follows. The current is still alternating in character, despite passing through the transformer.

The current from the transformer is now led to a most ingenious device which we may call an electric turnstile. It is similar in action to the turnstiles used in subways and electric railways for the purpose of letting persons pass through in one direction but barring them if they try to pass through in the reverse direction. Such an electric turnstile is called a rectifier. In the usual "B" eliminator either the Raytheon or Rectron rectifier is employed. The former is a gaseous conductor tube, without a filament to burn. The initial current causes a certain breakdown or ionization of the gas, which establishes a path for the one-way conduction of the alternating current. In the case of the Rectron, a filament is employed, and the particles or electrons given off by the heated filament metal establish the one-way bridge for the alternating current. Some "B" eliminators employ chemical cells which have the one-way conduction property.

Filter Stops Ripples.

Most "B" eliminators are full-wave rectifiers, which means that the entire alternating current is passed through by means of a double turnstile arrangement, with one gate thrown open while the other is closed, and vice versa, for greatest efficiency. Half-wave rectifiers present only one turnstile, which is thrown open only at every other interval when the alternating current is flowing momentarily in the right direction.

Now the current that has passed through the electric turnstile or rectifier is flowing in one direction only. Because of the turnstile action, it comes in pulses, so that it is called pulsating direct current. If applied to delicate radio circuits these little pulsations or electric ripples would make their presence known by excessive hum. So the current must be passed through a filter to iron out the ripples.

The filter consists of two elements, namely, choke coils and filter condensers. The choke coils serve to check the pulsating current, while the filter condensers serve to store the current. A beautiful electrical balance is struck between chokes and condensers. It is as though we were employing a dam to control the spring freshets, which would otherwise pour down a valley as uncontrollable floods. The chokes are the dam, while the condensers are the impounding area or reservoir behind the dam. As a result of the damming action the freshets are converted into a steady flow of water throughout the year for irrigation and other useful purposes, just as the pulsating current from the "B" eliminator filter is converted into a steady flow of current, quite free from hum.

The Register Bank.

Now the current issuing from the filter circuit would be ready for use if just the full output voltage were desired. However, it is seldom that a radio receiver can employ the full output at all times. Generally, there are various kinds of tubes requiring different voltages. Furthermore, a certain minimum load must be maintained across most filter circuits and rectifier tubes to insure proper and safe operation. Hence the filter output is now delivered to a so-called resistance, which in terms of analogy is like a gatehouse of a water-supply system, in that it distributes the flow of current over different channels.

Two Stations for India

Before the end of the year two large broadcasting stations in Bombay and Calcutta will be in operation by the recently licensed Indian Broadcasting company, a report to the Department of Commerce states.

Sees Shields and One

R. F. Stage in Future

How copper shielding prevents loss in selectivity as the sensitivity of a radio set is increased, is described by Robert F. Gowen of the Institute of Radio Engineers in a survey of magnetic shielding prepared for the Copper and Brass Research association.

Pointing out that the selectivity of a set gets worse as the sensitivity becomes higher, Mr. Gowen explains that "adding stages of radio-frequency amplification to provide increased sensitivity broadens out the tuning so that, when the signals are delivered to detector tube, there are usually mixed with them signals from other stations operating on nearly the same frequency."

"This loss in selectivity results from the fact that radio-frequency stages added are usually damped or neutralized in order to prevent oscillation due to inner-stage feed back of energy from the coupling between the inductances used."

Many schemes are used to prevent this feed back without excessive damping and, according to the survey, when more than two stages of radio-frequency are employed the problem becomes more difficult. It becomes necessary to use magnetic shielding to prevent coupling between the inductances of the set and to prevent the loss in selectivity as the sensitivity is increased.

Experiments show that inter-stage shielding is not enough, and Mr. Gowen declares that "the day is not far distant when all receivers will be enclosed in completely shielded copper cases. Otherwise it will not be possible, with broadcast stations working on superpower, for a set in a congested transmitting area to be affected by the desired station alone." Stromberg-Carlson is cited as one manufacturer who has shielded enough to make it worth while and has used sheet copper for shielding. Indications are that battery leads must be shielded eventually also.

"Engineers and manufacturers are now beginning to see that the trend toward the ideal set of the future is to reverse the present practice of building supersensitive receivers of a great number of tubes as these receivers require an excessive amount of power supply and maintenance with elaborate shielding to prevent inter-stage oscillation in the radio-frequency stages. The new line of development is to build a simple receiver embodying not more than one radio-frequency stage of highest efficiency and selectivity in a thoroughly shielded copper cabinet. The highly efficient Brown-Drake and Hamerlund-Roberts sets are good present-day examples of this design. It is safe to assume that eventually the shielded cabinet will include the power unit (or batteries) until power units are fully developed so that there can be no chance of "pickup" from cables employed for connection."

Plug-In Mounting for the Short-Wave Coils

A very convenient and inexpensive set of mountings for short-wave coils can be made from a few UX tube bases, a UX socket, and a few strips of bakelite.

The tube bases are cut off as illustrated and soldering lugs are soldered to the tops of the prongs.

Then a hole is drilled in the center of the tube base and it is bolted to the bakelite strip. Care must be taken that the head of the screw does not

How to Mount Plug-In Coils in a Vacuum-Tube Socket.

project above the surface of the strip, so that it will not come in contact with the coil.

This strip is drilled at the ends and the coil is bolted to it by another strip of the same length.

The socket is mounted on one end of a wider strip and the primary on the other.

The mounting for the primary is made out of a piece of 1/4-inch bakelite, supported by a bracket which is made from a piece of sheet brass and a piece of brass tubing. The coil is bolted to it by another strip of the piece of bakelite.

Two pieces of heavy copper wire are fastened tightly into holes in the piece of bakelite. These are used as terminals for the primary.

If a subpanel is used the socket and the primary may be mounted directly on the subpanel.—Radio News.

Should Be Tapped Alone

If using a fixed crystal as a detector, let it fit into a pair of clamps rather than attaching it rigidly to the rest of the set-up. Occasionally, in order to enjoy the best in reception, it will be necessary to tap the crystal to bring together new sensitive spots. If this tapping is done while the crystal remains hooked in the circuit, the rest of the set suffers. Some connections may be jarred loose. Tapping the crystal while removed from its clamps obviates this possibility.

Daddy's Evening Fairy Tale

By MARY GRAHAM BONNER

THE SUN'S WORK

"Most people cannot see anything very attractive about mud—although I do know a little boy, and a little girl, for that matter, who are pretty fond of mud puddles!" began Daddy.

Nick and Nancy laughed very heartily, for they knew perfectly well that Daddy meant them!

"There had been so much mud," continued Daddy, "from all the storms and all the rain that the big people were grumbling about it."

"They said it was horrid for driving, horrid for walking, horrid for riding in big automobiles, and very, very bad for beautiful shoes."

"The fairies heard all this when the big people didn't know the fairies were listening."

"The fairies could not help laughing about the mud hurting the beautiful shoes of the big people."

"You see, the fairies can alight with their wings and fly just over the mud if they like."

"We'll have a mud palace," said one little fairy. "A real castle with courtyards, and secret passages, and a

Made Out of Mud.

haunted room, and there will be beautiful court ladies and court gentlemen."

"All of the fairies at once began to work. There was plenty of mud, and it molded into the castle so quickly and so easily."

"The court ladies and court gentlemen were made out of mud, too."

"Now, maybe you don't think that sounds very like court ladies and court gentlemen—to be made of mud, but when the fairies do any work it is sure to be fine."

"These court ladies and court gentlemen were very grand and impressive looking."

"They wore crowns of pebbles which fitted around their mud heads so perfectly."

"Soon they looked as if they were made of something far lighter and gayer than mud."

"But that was Mr. Sun's work. He came out to see what the fairies were up to, and he said to them:

"Dear me, little fairies, you'll never give an old fellow like me a holiday."

"Here, I was, going off to visit some of my friends. I didn't mind at all what the big people were saying about the rain and the mud."

"I knew the rain needed a trip to earth. But what was more, I was looking forward to a good change."

"Now you come along and enjoy the mud just as much as you do the dry earth when I've been shining hard. It has just made me mad, so I've come out to stay for awhile."

"Besides, I've always got to be seeing what you are doing. Of all the ideas in the world, though, this is the funniest one!"

"A mud palace! Ha! Ha!"

"Dear Mr. Sun, you mustn't be hurt because we love the rain and the mud that makes such a lovely castle for us."

"We love you, too, but we love everything, you know, and are always happy."

"Later in the day, the mud began to go away, and the sun heard people saying how nice it did seem to see the horrid old mud disappearing."

"Quietly to himself he said:

"Well, if it hadn't been for the fairies who are happy all the time, I wouldn't have come out."

"So, again, big people, it's the little fairies you should really thank!"

Parked Away From Mother

Mother took her four-year-old son, Willie, to spend the week-end with his grandmother, as his grandfather had to leave the city for a few days.

It was the child's first time away from his mother.

When grandfather returned home, Willie met him with these words: "Hello, grandpa, I've been parked here, away from mother, for days."

Innocence

She was a bright little thing, aged four, when her mother presented her with twin brothers, and at last she was allowed to see the new babies.

Silently she inspected them as they lay in their cots. Then she looked in a puzzled way at her mother, and asked: "Mummy, was I two when I was a baby?"

His Answer

Found on the registration card of a freshman in an eastern college: Question—Give your parents' names.

Answer—Mama and papa.—Exchange.

Editor Adam Grant's Daughter

By DOROTHY DOUGLAS

(Copyright.)

OLD Adam Grant, editor and proprietor of one of the great Western newspapers, never wanted it said of him that he gave preference to any member of his own family—in the matter of positions on his staff.

That was why his lovely daughter, Eve, found herself established in a small flat in New York, surrounded by and observing the contents of a hundred and one magazines. Laboriously and very intelligently she was studying the world of fiction from the magazine standpoint.

"When you've mastered the analytical sense and can express it in words that convey your meaning to the readers of my paper—then and only then can you have a position on my staff," Old Adam had told Eve. "If you stay at home here among your friends you won't get anywhere. Hop off to New York for a year and pack that pretty head of yours with first-hand knowledge."

Aunt Clem, her mother's sister, who had come along with her, bored at times into reading the personals in the papers, came across the advertisement that gave her an idea.

It read, "Old magazines wanted by writer." Aunt Clem answered the advertisement and left a huge bundle of magazines to be called for.

Not by the proverbial candle, but beside a well-lighted table, young Avery Weldon carried on his as yet embryonic authorship. But he was working desperately hard to succeed and was reading fiction in the magazines voraciously in order to get a drift with the market.

That was how the huge pile of old magazines happened to be on the floor beside him. He couldn't quite afford to buy all the new ones and his advertisement had brought him many.

Avery scanned the title pages and sat up and rumbled back that smooth gold hair.

"By jove! This is funny!"

Beside the title of the stories were fine marginal notes of criticism, couched in terse but most expressive language.

"Medium. Not bad. Piffle. No point. Wishy-washy. Very good. Why was it given space? Doesn't know men. Needs to study women."

Avery swiftly picked up the publications that had printed his own work and with a somewhat shrinking heart opened the page. Yes, there beside his own story which he had in a moment of stupidity called "Rose of the Desert" he saw the words, "Author in the making, but sadly lacking the human touch."

Avery puffed a bit furiously at his pipe. The nail was hit straight on the head. Avery knew that. A kindly editor had only recently suggested the same thing.

And because a real author must not be strictly conventional or too awfully bound by laws of society. Avery got up, put on his hat and strolled toward the apartment building from whence his magazines had arrived.

The elevator took him up to the fifth floor and there left him. And in another few moments he was standing at an opened door. Aunt Clem herself was out, but Eve had answered his ring.

Avery didn't know what to say now that he was there and with Eve's calm eyes gazing at him he felt that he made rather a sorry story of the incident of buying the old magazines.

But Eve was very nice about it and invited him in.

"I didn't even know my aunt had cleared them out," she said as he followed her into a magazine-strewn room.

"I wanted so desperately to chat with the critic who had jotted those remarks down that I chanced coming here," he said, boyishly. "My dad has given me a year to make good in story writing, bless him," he went on, seeing the kindling interest in Eve's eyes, "and I believe if you'd be so good as to help me, with criticism I could win out."

"I know you could," was Eve's unexpected reply. "I see it somewhere in the deep places of your stories—I would love to help you."

She told him then about her own dad and who he was and all about home, and Avery laughed. Then he pulled a frayed letter from his pocket—a letter written some six months before, and handed it to her.

"Avery, my boy," it ran, "while you're messing about with your writing, just take time to look up Old Adam Grant's daughter. She's gone to New York to make good, too. Fine girl, too, from what her dad says, but then perhaps I say the same to Grant, about my boy—" Eve read no further until she had cast accusing eyes at Avery.

"I like that! Six whole months and you've never even taken the trouble—"

"And darn glad I am, too," said Avery. "If I knew you all this time I doubt if a single story would have left the typewriter—I should have been bumped into a dream so glorious I—oh, I say, Eve, when do we go back home—I'm longing for the time when I can get down to hard work and make use of all this study to do the big work that only you can help me with."

Aunt Clem came in and smiled—she knew a thing or two.

SAY "BAYER ASPIRIN" and INSIST!

Unless you see the "Bayer Cross" on tablets you are not getting the genuine Bayer Aspirin proved safe by millions and prescribed by physicians for 25 years.

DOES NOT AFFECT THE HEART

Safe Accept only "Bayer" package which contains proven directions. Handy "Bayer" boxes of 12 tablets. Also bottles of 24 and 100—Druggists.

Ma Buzz gets it in the neck

FLIT spray clears your home of mosquitoes and flies. It also kills bed bugs, roaches, ants, and their eggs. Fatal to insects but harmless to mankind. Will not stain. Get Flit today.

Airplane to Be Fast

A new airplane that is claimed to be able to travel between Rome and New York in six hours and between Rome and London in one hour is being examined by experts in Europe. It is proposed to fly the machine at an altitude of 25,000 feet, where the atmosphere is so rarefied that there would be little air resistance.

For speedy and effective action, Dr. Peery's "Dead Shot" has no equal. A single dose cleans out Worms or Tapeworm. 272 Pearl St., N. Y. Adv.

Degree in Journalism

The Boston university department of journalism maintains the first four-year degree in newspaper work in New England. The department grants the bachelor of journalism degree upon completion of the requirements.

Of Course

First Youth—Fighting is all right provided you do it intelligently. Second Youth—Yes, but you can't always find a smaller man.

There is no evil in the world without a remedy.—Sannazaro.

Says Dangerous Varicose Veins Can Be Reduced at Home

Rub Gently and Upward Toward the Heart as Blood in Veins Flows That Way.

If you or any relative or friends are worried because of varicose veins, or bunches, the best advice that anyone in this world can give you is to ask your druggist for an original two-

ounce bottle of Moone's Emerald Oil (full strength) and apply night and morning to the swollen, enlarged veins. Soon you will notice that they are growing smaller and the treatment should be continued until the veins are of normal size. So penetrating and powerful is Emerald Oil that even Piles are quickly absorbed. Your druggist sells lots of it.

Cuticura Talcum is the Ideal Powder

Its purity, smoothness and fragrance, combined with antiseptic and prophylactic properties, which help to overcome disagreeable odors, make it an essential toilet requisite.

Soap 25c, Ointment 25c and 50c, Talcum 50c. Sold everywhere. Sample each free. Address: Cuticura Laboratories, Dept. 23, Malden, Mass.

Cuticura Shaving Stick 25c.

DALY CITY

NEWS NOTES OF PERSONAL INTEREST

By MARC WORST

George Ford and Jack Gowland were visitors in Guerneville during the recent holidays.

Robert Nelson, of Hillcrest Drive, is still on the sick list. He has been quite ill for some time.

Mrs. Rose Smith and Mrs. Ella Jackson and Mr. Graham drove through parts of Marin county last Sunday.

Company No. 2, Daly City Volunteer Fire Department, held a very successful whist Tuesday evening in the company hall.

Mr. and Mrs. A. Widasky, of 35 West Lake avenue, are the proud parents of a baby daughter, Jean, born at St. Luke's hospital, May 30.

Mrs. A. Devlin and Miss Irene Devlin spent last Sunday in San Jose with friends. During the day Miss Irene and Miss Iverne Granz took a trip in an aeroplane.

A double bill will be presented at the State Theatre next Sunday, June 5, Bebe Daniels in "Stranded in Paris," and Lon Chaney in "Flesh and Blood."

Mrs. B. Melano spent the week end holidays with her twin sons in Sacramento.

Mr. and Mrs. John O'Brien, of Willits street, stayed in Guerneville over the week end.

Mr. and Mrs. Henry Westkamper, of Oakland, visited friends on Theta avenue last Sunday.

A number of members of Company No. 4, Daly City Volunteer Fire Department spent the week end at Lompico.

Mrs. William Hopman spent the week end in Santa Rosa, visiting Mr. and Mrs. Fred Parker, former residents of Daly City.

Mrs. F. Fenstermaker made a business trip to Daly City the first of the week and will return for another month in Marin county.

Mr. and Mrs. Ed Ford, Mr. and Mrs. Ed Trear and Mayor and Mrs. H. H. Smith spent the Memorial Day holidays at Guerneville.

Mr. and Mrs. C. Reinhart and daughter Helen, Mrs. S. A. Landini and Gladys Oakley spent Sunday in Palo Alto with Mrs. W. G. Fuhr.

H. H. Smith purchased a new Chevrolet coupe last Wednesday.

J. J. Fahey and family motored to Santa Cruz over the week end, and report having had a splendid outing.

Mr. and Mrs. Harold De Gurre and family, of Winchester street, spent the week end in Pinnacles National Forest.

Mr. and Mrs. George Archer, of Templeton avenue, left this week by motor for West Virginia. They expect to be gone about two months.

The Daly City firemen will play baseball with the Burlingame department at 10 o'clock next Sunday morning on the Jefferson high diamond.

El Carmelo Parlor No. 181, Native Daughters of the Golden West, will hold a whist party in Masonic Hall, Daly City, on Wednesday evening, June 15.

Mrs. B. Rolands, of Hillcrest Drive, and Mrs. M. White, of Theta avenue, spent the holidays with Mr. and Mrs. Briar, of Hickman, a former resident of Daly City.

W. J. Savage spent Sunday at Ross, Marin county, with Mr. and Mrs. J. L. Brown, former residents of Daly City. As usual, he indulged in a hike, but not one of his customary strenuous ones.

Mrs. Sylvia Haubrich Fischer was re-elected president of El Carmelo Parlor No. 181, Native Daughters of the Golden West, for a second term at the meeting held on Wednesday evening in Masonic Hall.

This Saturday, June 4, the State Theatre will present "The Third Degree," a picture that has received a splendid endorsement wherever it has been presented. An added feature will be the Kiddie Revue.

Gene Stratton Porter's "Laddie" will be the feature picture at the State Theatre next Friday, June 10. In addition "The Country Store" will hold forth, to the delight of the State patrons.

Miss Gussie Devlin, proprietress of the Helene Beauty Parlor, has been very ill the last week, but is now able to be up and around. During her absence, Miss Judy McNaught has had charge of the Beauty Shoppe.

A whist party and dance will be given next Tuesday evening at the Daly City Auditorium for the benefit of St. Maximus church. Mrs. L. Shaw is chairlady, and will be assisted by the ladies of the Golden West booth. A large crowd is expected.

"The Forlorn River," with Jack Holt and Raymond Hatton in the leading roles, is scheduled for two days at the State Theatre, next Wednesday and Thursday, June 8 and 9. This picture comes highly recommended, and large crowds are expected at each performance.

The annual convention of the order of Native Daughters of the Golden West will be held in Modesto during the week of June 20 to 25. Mrs. Sylvia Fischer, Mrs. Lorraine Wall and Mrs. Josephine McFarlin of San Bruno will represent El Carmelo Parlor as delegates. Grand Trustee Josephine Johnson will also be in attendance.

Jacob Kobler, 98 Crocker avenue, celebrated his 77th birthday on May 24. A number of his friends gathered at his home in honor of the occasion, an enjoyable evening being spent, a splendid dinner being one of the entertaining features of the evening. Mr. Kobler has been a resident of Daly City for four years and conducts a grocery store on Crocker avenue.

Mr. and Mrs. Thomas J. Beeson, of the Thomas Jefferson Cleaning Works, and infant son Junior, have just returned from their vacation and report having a wonderful time with friends in Hollywood. This has been their first vacation during their seven busy years in Daly City, and the play-time was all too short. However, rush in business demanded their immediate return and they are back on the job, helping to keep our city clean.

Miss Judy McNaught, formerly owner of the Madison Beauty Shoppe in Seattle for four years, is now working steady at the Helene Beauty Shoppe, 6065 Mission street. This young lady is well trained in the art of beauty culture, and, with Miss Gussie Devlin, they will make a specialty of finger waving and water waving, marcelling, haircutting, etc. The increase in Miss Devlin's trade has made it necessary for two operators to be in attendance.

The past week has been "absorption and cram" week in the grammar schools. The final examinations were held Thursday. Over 100 pupils took their last grammar school examinations. The largest number of graduates will be from Woodrow Wilson, with Crocker second. The Crocker graduation will be on next Tuesday, June 7, in the Jefferson Union high school auditorium. Woodrow Wilson and Jefferson will hold a joint graduation on Thursday, June 9, in the high school. The high school trustees have been very courteous in allowing the use of the auditorium.

Charles Druids and Earl McDaniels visited Mrs. M. Murphy and family Tuesday evening.

The fire commissioners will hold their regular meeting next Monday evening at the City Hall.

Mrs. H. Stockwell, of Berkeley, spent the week end with her sister, Mrs. E. R. Blaylock, of Evergreen avenue.

Mr. Roddenberg, of Templeton avenue, has been spending his spare time building a beautiful tile goldfish pond in his back yard.

A marriage license to Miss Annette R. Robertson, 26, of Daly City, and John L. Sjoedin, 29, of Presidio, was reported in the Thursday morning papers.

The Ladies' Auxiliary of Company No. 4, Daly City Volunteer Fire Department, held its regular meeting at the home of Mrs. Fonseca on Thursday evening.

Charles Gust, of Shakespeare street, had the bad luck of seeing a fire burn down a small store he had built in Rockaway Beach one day before its scheduled opening.

At a special meeting last Tuesday evening, the fire commissioners set Wednesday evening, July 3, as the date for the Daly City Volunteer Fire Department theatre party. The show will be at the State Theatre.

Mr. and Mrs. R. Young, of Evergreen avenue, Mrs. J. O'Rourke and daughter Winifred, of Evergreen avenue, and Dick Plath spent the Memorial Day holidays in the Pinnacles National Forest, San Benito county.

Stanley Fletcher, of San Francisco, ran into the rear end of the city's speedy Hudson, Sunday afternoon, as it was parked at Mission and Wellington. He was arrested by Officer Hilton for reckless driving and released on \$250 bail. The car was badly damaged, and Marshal Doyle and his men will be compelled to use their own cars in chasing speeders for several days more until it is repaired.

Mr. Eugene A. Pescara passed away Thursday afternoon at 1:30 o'clock, at his home at 6398 Mission street, after an illness of some time. Funeral services will take place tomorrow, Saturday, June 4. There will be a requiem high mass at St. Maximus church. Interment in Holy Cross cemetery. Mr. Pescara was a native of Italy, 39 years old. He leaves his wife, Laura, a son, Richard, and two sisters and a brother.

When leaving on your vacation, kindly drop in and leave your name, address and length of time you expect to be absent, at the city marshal's office. By doing so he can guarantee you far better protection. Lock all doors and windows, even if leaving only for the evening. Always call Randolph 55 in case of seeing any suspicious characters. The marshal and his men will appreciate your assistance in these matters.

Mr. and Mrs. George Augustien and family, Mr. and Mrs. R. Foppiano and family, Mr. and Mrs. R. F. Emerson and son John, Mr. and Mrs. Arthur Emerson, Henry and Elmer Blaylock, Mr. and Mrs. Prentiss and family, Mr. and Mrs. H. Chandler and family, Mr. and Mrs. Dimenci, Mr. and Mrs. A. Chesney, Mr. and Mrs. E. Cuneo and family spent the Memorial Day vacation at Lompico, in the Santa Cruz mountains. Harold Chandler upheld the honor of Daly City fishermen by landing seventeen trout in two days.

The Mission Auto Camp reports completion of its eight beautiful Spanish type cottages. All were occupied immediately, and visitors are so enthusiastic that additional cottages will soon be erected. This makes a total of sixty-five cabins. Each of the new cottages is a little home, completely furnished, with folding beds and tables, and all modern sanitary conveniences. Back of these there is a community hall and camp store arrangement. Groceries and gasoline will be sold only for the convenience of the camp patrons. A large electric sign is being placed in front of the camp.

A BARGAIN

On account of death, you can buy a fine store, doing good business, four living rooms adjoining store; candies, lunches, school supplies, and cigars. Known as Frank's Noodle House, No. 6997 Mission road. Just the thing for a small family. Phone Randolph 8562. F. W. Galvery.

Californian

- in origin
- in spirit
- in ownership
- in management
- in progressiveness
- in ideals
- in patronage
- in scope

The Bank of Italy belongs to the people of California—and it is as typically Californian as the historic Missions founded by the Franciscan fathers. QAs this institution has grown in scope—reaching new communities with its banking service—it has become more and more democratic in spirit, because of the increase in the number of its stockholders. QToday, the Bank of Italy is literally owned by the people of the State of California.
